Artificial Intelligence, Culture and Language: On Education and Work Bo Göranzon, Magnus Florin, 2012-12-06. This book springs from a conference held in Stockholm in May/June 1988 on Culture, Language, and Artificial Intelligence. It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science, etc. It was an initiative from the Swedish Center for Working Life based on the project AI Based Systems and the Future of Language, Knowledge, and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference or in some cases researchers related to its aims were chosen to contribute to this book. It was preceded by Knowledge, Skill, and Artificial Intelligence, ed. B. Göranzon and L. Josefson, Springer Verlag, London, 1988, and will be followed by Dialogue and Technology, ed. M. Florin and B. Göranzon, Springer Verlag, London, 1990. The contributors' thinking in this field varies greatly, so do their styles of writing. For example, contributors have varied in their choice of he or she for the third person. No distinction is intended, but chapters have been left with the original usage to avoid extensive changes. Similarly, individual contributors' preferences as to notes or references lists have been followed. We want to thank our researcher Satinder P. Gill for excellent work with summaries and indexes, and Sandi Irvine of Springer Verlag for eminent editorial work.

Awareness Social Science 10 Suman Gupta, The syllabus has tried to link the academic curriculum with real life and thus dwelled on connecting the students' understanding with the real world around them.
