In my life, I like to do lot of activities; those activities help me exercise and made me feel alive, and my favorite activity is cooking because cooking is very simple. I started to cook when I was about 10 years old, when I was home alone all by myself and I was pretty hungry, I just got some bread, some cheese and put it in a microwave oven for 30 minutes and made me a grilled cheese sandwich. Since then I had been cook my own food when I was home or I have a lot of free time, I . Cooking is my favorite activity because it is a way for me to reduce stress and I can be artistic about it and it never gets repetitive. First, it's a great way for me to reduce stress. Cooking and eating always help me to reduce stress, when every time I got all upset or stressed up I can just cook something I want and eat it, the deliciousness of the food I cooked had help me to reduce stress, but it was after started cook good. And I can do it regardless of the weather. When it's warm outside, I can fire up the grill. When it's cold, I can use the stove top. Since I use cooking as a way to reduce stress, this is very important to me. Then I can be be artistic about cooking. To be real, I have no real artistic talent when it comes to drawing, painting or other things involve art. However, in the kitchen, I can use a variety of ingredients that add color and make the meals look as good as they taste. Also I can different kind of goods mix together to make my own original dish, but usually the original ones are Chinese food, sometimes I mix pasta with shrimps or broccoli once, those taste pretty well. And after I done, I can post my dishes online or bring to school to share with friends, it help to bond with my friends.. Finally, it never gets repetitive. One of the reasons people normally have problems keeping a activity is they usually get bored with it if they are doing the same thing all the time. But for me and cooking, I don't have that problem because I can always change things up. Even if I'm making something I've made before, I can try a different spice or experiment with a different ingredient, like to cook squid with beef instead use some vegetables or cook shrimp with beans, mostly those some Chinese food recipes I made. Cooking had always been my favorite activity since I was a kid. It always a good way to reduce my stress, it help me bond with my friends with food I made, I always can be artistic when I cook and it can never get repetitive. Cooking is my favorite activity and I love it.

**Evolution of Love** Emil Lucka, Ellie Schleussner, 2024-11-24 The object of this book which is addressed to all cultured men and women is to set forth the primitive manifestations of love and to throw light on those strange emotional climaxes which I have called Metaphysical Eroticism I have taken no account of historical detail except where it served the purpose of proving explaining and illustrating my subject Nor have I hesitated to intermingle psychological motives and motives arising from the growth and spread of civilisation The inevitable result of a one sided glimpse at historical facts would have been a history of love an undertaking for which I lack both ability and inclination On the other hand had I written a merely

psychological treatise disregarding the succession of periods I should have laid myself open to the just reproach of giving rein to my imagination instead of dealing with reality I have availed myself of historical facts to demonstrate that what psychology has shown to be the necessary phases of the evolution of love have actually existed in historical time and characterised a whole period of civilisation The history of civilisation is an end in itself only in the chapter entitled The Birth of Europe My work is intended to be first and foremost a monograph on the emotional life of the human race I am prepared to meet rather with rejection than with approval Neither the historian nor the psychologist will be pleased Moreover I am well aware that my standpoint is hopelessly old fashioned To day nearly all the world is content to look upon the sexual impulse as the source of all erotic emotion and to regard love as nothing more nor less than its most exquisite radiation My book on the contrary endeavours to establish its complete independence of sexuality My contention that so powerful an emotion as love should have come into existence in historical not very remote times will seem very strange for all outward profession of faith in evolution notwithstanding men are still inclined to take the unchangeableness of human nature for granted The facts on which I have based my arguments are well known but my deductions are new it is not for me to decide whether they are right or wrong In the first introductory part I have made use of works already in existence in addition to Plato and the poets but the second and third parts are founded almost entirely on original research E L
