approaches in the Slovak Republic *PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic, Financial Literacy and Collaborative Problem Solving* OECD,2017-08-31 What is important for citizens to know and be able to do The OECD Programme for International Student Assessment PISA seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills Understanding and Applying Assessment in Education Damian Murchan,Gerry Shiel,2017-04-29 All teachers are responsible for assessing the children they teach and the outcomes of any assessment are important for individual learners and the wider school This book is your one stop shop for understanding assessment in schools It covers formative and summative approaches used across primary and secondary education supporting a balanced overview with policy examples drawn from the UK Ireland and wider international contexts Designed as a pragmatic handbook for new teachers and those training to teach the book discusses key principles of assessment before providing guidance on developing and carrying out assessment in the classroom and looking at how assessment information can be used to benefit your teaching and the children you teach Diversity in Mathematics Education Alan Bishop,Hazel Tan,Tasos N Barkatsas,2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response Typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education The book is written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore **Voicing Code in STEM** Pratim Sengupta,Amanda Dickes,Amy Voss Farris,2021-03-09 An exploration of coding that investigates the interplay between computational abstractions and the fundamentally interpretive nature of human experience The importance of coding in K 12 classrooms has been taken up by both scholars and educators Voicing Code in STEM offers a new way to think about coding in the classroom one that goes beyond device level engagement to consider the interplay between computational abstractions and the fundamentally interpretive nature of human experience Building on Mikhail Bakhtin s notions of heterogeneity and heteroglossia the authors explain how STEM coding can be understood as voicing computational utterances rather than a

technocentric framing of building computational artifacts Empirical chapters illustrate this theoretical stance by investigating different framings of coding as voicing

Research Anthology on Bilingual and Multilingual Education Management Association, Information Resources, 2021-10-29 Given the boost in global immigration and migration as well as the emphasis on creating inclusive classrooms research is turning to the challenges that teachers face with the increasing need for bilingual and multilingual education The benefits of bilingual education are widespread allowing students to develop important cognitive skills such as critical thinking and problem solving as well as opening further career opportunities later in life However very few resources are available for the successful practice and implementation of this education into the curriculum with an even greater lack of appropriate cultural representation in the classroom Thus it is essential for educators to remain knowledgeable on the emerging strategies and procedures available for making bilingual and multilingual education successful The Research Anthology on Bilingual and Multilingual Education is a comprehensive reference source on bilingual and multilingual education that offers the latest insights on education strategy and considerations on the language learners themselves This research anthology features a diverse collection of authors offering valuable global perspectives on multilingual education Covering topics such as gamification learning processes and teaching models this anthology serves as an essential resource for professors teachers pre service teachers faculty of K 12 and higher education government officials policymakers researchers and academicians with an interest in key strategy and understanding of bilingual and multilingual education
