It might be argued that the report's findings are biased because the study's participants were not randomly selected. The study did not include a control group who were not exposed to the media coverage, and the study's findings may be biased because the study's participants were not randomly selected.

11. *Journal of the American Medical Association*, 273:1221-1222, 1995

These findings suggest that there are important differences between the two groups.
