There could be a number of reasons that causes an elevator to break down. For one, the system might have taken one too many trips and is already showing signs of wear and tear. It could also be caused by a power failure, or a mechanical malfunction of one or several of an elevator's many parts. There are unexpected scenarios that cannot be predicted no matter how good maintenance is done, and these issues need to be addressed immediately before it blows up to a bigger, more complicated problem later on.
