Emotion And Value:

Emotion and Value Sabine Roeser, Cain Todd, 2014-11-06 This volume brings together new work by leading philosophers on the topics of emotion and value and explores issues at their intersection Philosophers and psychologists working on the emotions have reached something of a consensus about the complex inter related nature of the affective and cognitive components of emotions and have increasingly focussed on the important epistemological role that emotions play in giving us access to values At the same time an increasing number of philosophers have become attracted to analyses of value that give emotions a prominent place in evaluative judgements and experiences The work undertaken in each of these areas has important implications for current research on topics such as the role that emotions play in practical rationality and moral psychology the connection between imagination and emotion in the appreciation of fiction and more generally with the ability of emotions to discern axiological saliences and to ground or fail to ground the objectivity of ethical or aesthetic value judgements This volume makes a unique contribution to scholarship on emotion and value by bringing together top authors from these lines of research In addition the volume contains a number of contributions that explore various links between the emotions and self understanding touching on a range of themes that include depression empathy agency guilt and self trust All of these issues are approached from a number of different perspectives in order to present the reader with a wide view of this extremely rich terrain and to demonstrate how the latest thinking in a number of currently intensive areas of research is deeply interconnected

Emotion as Feeling Towards Value Jonathan Mitchell, 2021 Much of what we take to be meaningful and significant in life is inextricably linked with our capacity to experience emotions Here Jonathan Mitchell considers emotional experiences as sui generis states to be given their own place within our mental economy and proposes an original view of emotional experiences as feelings towards values

Emotional Value Janelle Barlow, Dianna Maul, 2000-04 Combining strategic advice with wisdom found in books such as Daniel Goleman's *Working with Emotional Intelligence* two international management consultants outline ways in which businesses can elevate levels of satisfaction

Kant on Emotion and Value A. Cohen, 2014-01-01 Distinguished international scholars discuss the connection between emotion and value in Kant's philosophy from his ethics to his philosophy of mind aesthetics religion and politics Through a mixture of interpretation and critical discussion this collection demonstrates the continuing relevance of Kant's work to philosophical debates

Fact and Value in Emotion Louis C. Charland, Peter Zacher, 2008 There is a large amount of scientific work on emotion in psychology neuroscience biology physiology and psychiatry which assumes that it is possible to study emotions and other affective states objectively Emotion science of this sort is concerned primarily with facts and not values with description not prescription The

assumption behind this vision of emotion science is that it is possible to distinguish factual from evaluative aspects of affectivity and emotion and study one without the other But what really is the basis for distinguishing fact and value in emotion and affectivity And can the distinction withstand careful scientific and philosophical scrutiny The essays in this collection all suggest that the problems behind this vision of emotion science may be more complex than is commonly supposed

The Value of Emotions for Knowledge Laura Candiottio,2019-04-23 This innovative new volume analyses the role of emotions in knowledge acquisition It focuses on the field of philosophy of emotions at the exciting intersection between epistemology and philosophy of mind and cognitive science to bring us an in depth analysis of the epistemological value of emotions in reasoning With twelve chapters by leading and up and coming academics this edited collection shows that emotions do count for our epistemic enterprise Against scepticism about the possible positive role emotions play in knowledge the authors highlight the how and the why of this potential lucidly exploring the key aspects of the functionality of emotions This is explored in relation to specific kinds of knowledge such as self understanding group knowledge and wisdom specific functions played by certain emotions in these cases such as disorientation in enquiry and contempt in practical reason the affective experience of the epistemic subjects and communities

Emotions and Values in Equity Crowdfunding Investment Choices 1 Christian Goglin,2021-02-17 Equity crowdfunding is a new way for seed stage start ups to generate initial capital and as such raises questions around the choices made by investors within this area Understanding it is important for investor protection as investors are generally unaware of the factors that can influence their decisions However investing in equity crowdfunding places the investor in a unique decision making framework in which resources such as images videos and storytelling are all mobilized by entrepreneurs and platforms as tools of persuasion This context thus seems to favor more holistic and emotional decision making rather than a process that is rational and analytical This first volume centers on the emotional and axiological determinants of choice A transdisciplinary theoretical analysis is carried out combining different fields within the social sciences primarily finance marketing and psychology This state of the art leads to the emergence of an original theoretical framework for understanding investment choices in equity crowdfunding

Ethics, Emotion, Education, and Empowerment Lisa Kretz, 2020-10-14 Universities teach courses in ethics but do they teach students how to be ethical in practice Lisa Kretz's *Ethics Emotion Education and Empowerment* explores the ways that philosophical ethics are currently taught and argues that dominant approaches fail to adequately support ethical action in part because emotions are all too often ignored or repressed in university classrooms In isolation abstract theoretical content fails to motivate The ability to reason through an ethical dilemma does not by itself of necessity impact ethical action Empowered action requires intentional emotional engagement Kretz argues that part of the reason affective pedagogy fails to get sufficient uptake is due to the operations of oppression There is a long history of the reason emotion dualism undermining recognition of the necessary and valuable epistemic roles emotions play in moral life and serving as a political tactic to undermine the experience of oppressed groups This impoverishes ethical pedagogy because it is to the detriment of their ability to teach ethics in a comprehensive way and strips the potential of supporting students to enact their own reflectively held ethical beliefs and values Using the example of the environmental crisis Kretz makes a case for supporting students as engaged activists aware of their capacity to ethically change the world *Emotion and Value* Daniel Vanello, 2016

Emotional Value in the Composition Classroom Ryan Crawford, 2023-08-24 Using the concept of plasticity or the brain's ability to change through growth and reorganization as a theoretical framework this book argues that encouraging an exploration of the self better establishes emotional value in the composition classroom This book explores recent evidence from studies in modern neuroscience to provide biological correlations between current and developing theory and pedagogy in Composition Studies Starting with the concept of self each subsequent chapter builds a neurobiological understanding of how emotional value intrinsic motivation creativity and happiness are constructed and felt This material exploration shows how these factors can maintain motivation improve long term memory encourage creative risk and initiate complex considerations of being Recognizing the shift in Composition Studies to posthuman and new materialist methodologies this modern neuroscience is presented as a useful parallel to rather than being at odds with these and other current methodologies theories and pedagogies Outlining the need for a more student focused guided discovery framework for the composition classroom this interdisciplinary resource will be of interest to scholars and students in the field of Composition Studies Communication Studies Education Psychology and Philosophy

Emotions, Values, and the Law John Deigh, 2008-10-24 *Emotions Values and the Law* brings together ten of John Deigh's essays written over the past fifteen years In the first five essays Deigh asks questions about the nature of emotions and the relation of evaluative judgment to the intentionality of emotions and critically examines the cognitivist theories of emotion that have dominated philosophy and psychology over the past thirty years A central criticism of these theories is that they do not satisfactorily account for the emotions of babies or animals other than human beings Drawing on this criticism Deigh develops an alternative theory of the

intentionality of emotions on which the education of emotions explains how human emotions which innately contain no evaluative thought come to have evaluative judgments as their principal cognitive component The second group of five essays challenge the idea of the voluntary as essential to understanding moral responsibility moral commitment political obligation and other moral and political phenomena that have traditionally been thought to depend on people's will Each of these studies focuses on a different aspect of our common moral and political life and shows contrary to conventional opinion that it does not depend on voluntary action or the exercise of a will constituted solely by rational thought Together the essays in this collection represent an effort to shift our understanding of the phenomena traditionally studied in moral and political philosophy from that of their being products of reason and will operating independently of feeling and sentiment to that of their being manifestations of the work of emotion Deigh's writing is clear and precise his arguments are strong and he uses a wide range of real world examples that give his essays a vibrant and very readable character Notre Dame Philosophical Reviews I believe that Deigh is as clear headed and insightful a philosopher as is currently at work today in the areas of moral political and legal philosophy and moral psychology and I believe these essays beautifully demonstrate his many virtues Herbert Morris University of California Los Angeles Law School John Deigh has acquired a very good knowledge of a field which he has very much made his own No one writes better or thinks more productively on that area of thought where the theory of the emotions psychoanalysis value theory and the theory of law intersect And if we closely connect the name Deigh with this particular concatenation of topics I believe that very soon there will be a number of voices clamoring to be heard in this area Richard Wollheim University of California Berkeley
