Directions: Read the passage below about motion sickness. Underline each cause that you find. Circle each effect that you find.

The Tummy Twist

Have you ever been on a boat, a car, or an amusement park ride and started to feel kind of funny in your stomach? This is called motion sickness. It's like a little puzzle that happens in our bodies.

Imagine you're sitting in a car or on a boat. Your eyes look at things around you, like the road or the water. At the same time, your inner ears, which help you keep your balance, feel the movement. Sometimes, these two things don't match. This can happen when you read a book while riding in a car. Your eyes see the book staying still, but your ears feel the car moving. This mix-up confuses your brain. That's when motion sickness can sneak in.

When your brain gets confused, it might send signals to your stomach. This can make you feel sick. You might notice more spit in your mouth, your stomach might feel upset, and you might even get sweaty. It's not a great feeling, but it's your body's way of trying to figure things out.

But don't worry, there are things you can do to help prevent or ease motion sickness. One trick is to look outside, straight ahead. This helps your eyes and inner ears match up the movements better. You can also try to keep still and not read or play on screens while you're moving. Keeping your mind busy with fun things, like talking to your friends or singing songs, can help distract you from that funny feeling.

If you're going on a car ride, it's a good idea to have some fresh air by opening a window. Chewing gum or snacking on crackers might help too. And if you're at an amusement park and want to go on those exciting rides, try starting with the slower ones. Then, move to the faster ones. This gives your body a chance to get used to the motion.
