**A Cultural History of Gardens in the Medieval Age** Michael Leslie, 2015-04-02 The Middle Ages was a time of great upheaval the period between the seventh and fourteenth centuries saw great social political and economic change The radically distinct cultures of the Christian West Byzantium Persian influenced Islam and al Andalus resulted in different responses to the garden arts of antiquity and different attitudes to the natural world and its artful manipulation Yet these cultures interacted and communicated trading plants myths and texts By the fifteenth century the garden as a cultural phenomenon was immensely sophisticated and a vital element in the way society saw itself and its relation to nature A Cultural History of Gardens in the Medieval Age presents an overview of the period with essays on issues of design types of gardens planting use and reception issues of meaning verbal and visual representation of gardens and the relationship of gardens to the larger landscape

The Medieval and Early Modern Garden in Britain Patricia Skinner, Theresa Tyers, 2018-04-09 What was a garden in medieval and early modern British culture and how was it imagined How did it change as Europe opened up to the wider world from the 16th century onwards In a series of fresh approaches to these questions the contributors offer chapters that identify and discuss newly discovered pre modern garden spaces in archaeology and archival sources recognize a gendered language of the garden in fictional descriptions fictional here being taken to mean any written text regardless of its purpose and offer new analysis of the uses to which gardens real and imagined might be put Chapters investigate the definitions forms and functions of physical gardens explore how the material space of the garden was gendered as a secluded space for women and as a place of recreation examine the centrality of garden imagery in medieval Christian culture and trace the development of garden motifs in the literary and artistic imagination to convey the sense of enclosure transformation and release The book uniquely underlines the current environmental turn in the humanities and increasingly recognizes the value of exploring human interaction with the landscapes of the past as a route to health and well being in the present

**The Enclosed Garden and the Medieval Religious Imaginary** Liz Herbert McAvoy, 2021 During the Middle Ages the arresting motif of the walled garden especially in its manifestation as a sacred or love inflected hortus conclusus was a common literary device Usually associated with the Virgin Mary or the Lady of popular romance it appeared in myriad literary and iconographic forms largely for its aesthetic decorative and symbolic qualities This study focuses on the more complex metaphysical functions and meanings attached to it between 1100 and 1400 and in particular those associated with the gardens of Eden and the Song of Songs Drawing on contemporary theories of gender gardens landscape and space it traces specifically the resurfacing and reworking of the idea and image of the enclosed garden within the writings of medieval holy women and other female coded

texts In so doing it presents the enclosed garden as generator of a powerfully gendered hermeneutic imprint within the medieval religious imaginary indeed as an alternative language used to articulate those highly complex female coded approaches to God that came to dominate late medieval religiosity The book also responds to the eco turn in our own troubled times that attempts to return the non human to the centre of public and private discourse The texts under scrutiny therefore invite responses as both literary and garden spaces where form often reflects content and where their authors are also diligent gardeners the apocryphal Lives of Adam and Eve for example the horticulturally inflected Hortus Deliciarum of Herrad of Hohenburg and the green philosophies of Hildegard of Bingen s Scivias the visionary writings of Gertrude the Great and Mechthild of Hackeborn collaborating within their Helfta nunnery the Middle English poem Pearl and multiple reworkings of the deeply problematic and increasingly sexualized garden enclosing the biblical figure of Susanna

Classen, 2024-07-01 The study of pre modern anthropology requires the close examination of the relationship between nature and human society which has been both precarious and threatening as well as productive soothing inviting and pleasurable Much depends on the specific circumstances as the works by philosophers theologians poets artists and medical practitioners have regularly demonstrated It would not be good enough as previous scholarship has commonly done to examine simply what the various writers or artists had to say about nature While modern scientists consider just the hard core data of the objective world cultural historians and literary scholars endeavor to comprehend the deeper meaning of the concept of nature presented by countless writers and artists Only when we have a good grasp of the interactions between people and their natural environment are we in a position to identify and interpret mental structures social and economic relationships medical and scientific concepts of human health and the messages about all existence as depicted in major art works In light of the current conditions threatening to bring upon us a global crisis it matters centrally to take into consideration pre modern discourses on nature and its enormous powers to understand the topoi and tropes determining the concepts through which we perceive nature Nature thus proves to be a force far beyond all human comprehensibility being both material and spiritual depending on our critical approaches      **The Taifa Kingdoms** , 2025-07-09 The 11th century has traditionally been regarded as a turning point in the evolution of medieval Iberia The dismantling of the Umayyad Caliphate of Cordoba gave way to a process of political and territorial fragmentation that contributed to weakening Islamic power vis a vis the incipient

**Middle English Medical Recipes and Literary Play, 1375-1500** Hannah Bower, 2022-03-21

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. *Middle English Medical Recipes and Literary Play 1375-1500* is the first detailed book-length study of Middle English medical recipes in their literary, imaginative, social, and codicological contexts. Analysing recipe collections in over seventy late medieval manuscripts, this book explores how the words and structures of recipes could contribute to those texts' healing purpose but could also confuse, impede, exceed, and redefine that purpose. The study therefore presents a challenge to recipes' traditional reputation as mundane, unartful texts written and read solely for the sake of directing practical action. Crucially, it also relocates these neglected texts and overlooked manuscripts within the complex networks forming medieval textual culture, demonstrating that though marginalized in modern scholarship, medical recipes were actually linguistically, formally, materially, and imaginatively interconnected with many other late medieval discourses, including devotional writings, romances, fabliaux, and Chaucerian poetry. The monograph thus models for readers modes of analysis and close reading that might be deployed in relation to recipes in order to understand better their allusive, fragmentary, and playful qualities, as well as their wide-ranging influence on medieval imaginations.

*Weeds and the Carolingians* Paolo Squatriti, 2022-06-09. Why did weeds matter in the Carolingian empire? What was their special significance for writers in eighth and ninth-century Europe, and how was this connected with the growth of real weeds? In early medieval Europe, unwanted plants that persistently appeared among crops created extra work, reduced productivity, and challenged theologians who believed God had made all vegetation good. For the first time in this book, weeds emerge as protagonists in early medieval European history, driving human farming strategies and coloring people's imagination. Early medieval Europeans' effort to create agroecosystems that satisfied their needs and cosmologies that confirmed Christian accounts of vegetable creation both had to come to terms with unruly plants. Using diverse kinds of texts, fresh archaeobotanical data, and even mosaics, this interdisciplinary study reveals how early medieval Europeans interacted with their environments.

**Gardens of Love and the Limits of Morality in Early Netherlandish Art** Andrea Pearson, 2019-02-26 In *Gardens of Love and the Limits of Morality in Early Netherlandish Art* Andrea Pearson charts the moralization of human bodies in late medieval and early modern visual culture through paintings by Jan van Eyck and Hieronymus Bosch devotional prints and illustrated books and the celebrated enclosed gardens of Mechelen among other works Drawing on new archival evidence and innovative visual analysis to reframe familiar religious discourses she demonstrates that depicted topographies advanced and sometimes resisted bodily critiques expressed in scripture conduct literature and even legislation Governing many of these redemptive green spaces were the figures of Christ and the Virgin

Mary archetypes of purity whose spiritual authority was impossible to ignore yet whose mysteries posed innumerable moral challenges The study reveals that bodily status was the fundamental problem of human salvation in which artists patrons and viewers alike had an interpretive stake

**Embodying the Soul** Meg Leja,2022-04-26 Embodying the Soul explores the possibilities and limitations of human intervention in the body's health across the ninth century Carolingian Empire Early medieval medicine has long been cast as a superstitious degraded remnant of a vigorous rational Greco Roman tradition Against such assumptions Meg Leja argues that Carolingian scholars engaged in an active debate regarding the value of Hippocratic knowledge a debate framed by the efforts to define Christian orthodoxy that were central to the reforms of Charlemagne and his successors From a subject with pagan origins that had suspicious links with magic medical knowledge gradually came to be classified as a sacred art This development coincided with an intensifying belief that body and soul the two components of individual identity cultivated virtue not by waging combat against one another but by working together harmoniously The book demonstrates that new discussions regarding the legitimacy of medical learning and the merits of good health encouraged a style of self governance that left an enduring mark on medieval conceptions of individual responsibility The chapters tackle questions about the soul's material occupation of the body the spiritual meaning of illness and the difficulty of diagnosing the ills of the internal bodily cavity Combating the silence on dark age medicine Embodying the Soul uncovers new understandings of the physician the popularity of preventative regimens and the theological importance attached to dietary regulation and bloodletting In presenting a cultural history of the body the book considers a broad range of evidence theological and pastoral treatises monastic rules court poetry capitularies hagiographies biographies and biblical exegesis Most important it offers a dynamic reinterpretation of the large numbers of medical manuscripts that survive from the ninth century but have rarely been the focus of historical study

**Bodily and Spiritual Hygiene in Medieval and Early Modern Literature** Albrecht Classen,2017-03-20 While most people today take hygiene and medicine for granted they both have had their own history We can gain deep insights into the pre modern world by studying its health care system its approaches to medicine and concept of hygiene Already the early Middle Ages witnessed great interest in bathing hot and cold swimming and good personal hygiene Medical activities grew over time but even early medieval monks were already great experts in treating the sick The contributions examine literary medical historical texts and images and probe the information we can glean from them The interdisciplinary approach of this volume makes it possible to view this large field in a complex and diversified manner taking into account both early medieval and early modern treatises on medicine water bathing and health Such a cultural historical perspective creates a most valuable bridge connecting literary and scientific documents under the umbrella of the history of mentality and history of everyday life The volume does not aim at idealizing the past but it definitely intends to deconstruct modern myths about the dirty and unhealthy Middle Ages and early modern age
