*Property Rights and Eminent Domain* Ellen Frankel Paul,2017-09-29 In a country built on the institution of private property property owner rights have been under attack By arguing that private property is a fundamental liberty whose protection deserves the highest priority

Ellen Frankel Paul challenges one of the dominant trends of the past half century the erosion of property rights via zoning and land use restrictions carried on by government exercising its police power or promoting the public interest Paul begins by examining the arguments of environmentalists in support of land use legislation and explores a few particularly troubling examples of the exercise of eminent domain and police powers She traces the philosophical arguments for the two powers as well as their tortuous judicial history the meaning of property rights and investigates how previous thinkers have defended these rights is detailed and Paul suggests a more adequate defense for them In the concluding portion of the book the very legitimacy of eminent domain is questioned and the author offers recommendations for its reform This analysis is wide in scope and makes creative use of historical legal economic and philosophic methodologies It not only gives an account of the present power regulations on land but also provides an exhaustive history of the development of the law in these two areas and of the philosophical ideas of the thinkers who helped shape this process This book is distinctive because it places a theory of the just acquisition of property at the heart of the answer to the question of the extent to which governments can rightfully exercise the powers of eminent domain and police Amazingly in a country built on the institution of private property the right to property in land has been under increasing assault and has seldom been defended Paul's book by arguing that private property is a fundamental liberty whose protection deserves the highest priority is a major step toward filling the void Robert Hessen Stanford University

Roman and Medieval Exeter and their Hinterlands Stephen Rippon, Neil Holbrook, 2021-04-30 This first volume presenting research carried out through the Exeter A Place in Time project provides a synthesis of the development of Exeter within its local regional national and international hinterlands Exeter began life in c AD 55 as one of the most important legionary bases within early Roman Britain and for two brief periods in the early and late 60s AD Exeter was a critical centre of Roman power within the new province When the legion moved to Wales the fortress was converted into the civitas capital for the Dumnonii Its development as a town was however relatively slow reflecting the gradual pace at which the region as a whole adapted to being part of the Roman world The only evidence we have for occupation within Exeter between the 5th and 8th centuries is for a church in what was later to become the Cathedral Close In the late 9th century however Exeter became a defended burh and this was followed by the revival of urban life Exeter's wealth was in part derived from its central role in the south west's tin industry and by the late 10th century Exeter was the fifth most productive mint in England Exeter's importance continued to grow as it became an episcopal and royal centre and excavations within Exeter have revealed important material culture assemblages that reflect its role as an international port
