Career Research Paper

The career that I had in mind when I first began college was one in counseling psychology. Luckily, this career was one matched closely to my interests and personality type. Although I've begun considering other career avenues, I still chose to research this specific career in depth.

A person in counseling psychology will typically use personality tests/assessments, interviews, case histories, and observation methods to evaluate a patient's problems, needs, and goals. Counseling psychologists will evaluate data and, from there, create an action plan or treatment plan to counsel the patient with. The goal in this career is to help each patient work toward developing and adjusting social, educational, personal, and vocational skills.

I'm most definitely interested in this career. I've always had an interest in listening to people and their "problems". Even in my early teenage years, and now into my adult years, people of all ages have come to me for emotional support, advice, and confidentiality. I've wondered what people see in me, but have always been humbled by the trust people place in me. The idea of helping people achieve a happier lifestyle is thrilling to me. The idea of being the person that one person can talk to about anything is very exciting and fulfilling to me; I love the idea of being a problem solver.

I see this career as having many advantages and few disadvantages. From a personal standpoint, the biggest disadvantage or problem I foresee is becoming too wrapped up in a patient's problems. I tend to worry, so this roadblock may be one to

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Kate L. Turabian, 2013-04-09
A little more than seventy five years ago Kate L Turabian drafted a set of guidelines to help students understand how to write cite and formally submit research writing Seven editions and more than nine million copies later the name Turabian has become synonymous with best practices in research writing and style Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines Now in its eighth edition A Manual for Writers of Research Papers Theses and Dissertations has been fully revised to meet the needs of today s writers and researchers The Manual retains its familiar three part structure beginning with an overview of the steps in the research and writing process including formulating questions reading critically building arguments and revising drafts Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles notes bibliography and author date an array of source types with contemporary examples and detailed guidance on citing online resources The final section treats all matters of editorial style with advice on punctuation capitalization spelling abbreviations table formatting and the use of quotations Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up to date listing of critical resources available A Manual for Writers remains the essential resource for students and their teachers

Writing Human Factors Research Papers Don Harris, 2016-12-05
Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented It is one thing to write a good scientific paper however it is quite another thing to get it published This requires some additional nous In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn t The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful All major points are illustrated with examples from his own published works The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to

deal with the referees comments Each chapter concludes with a checklist to ensure all the key elements have been addressed
