**Looking at Lives** Erin Phelps, Frank F. Furstenberg Jr., Anne Colby, 2002-05-30 The impact of long term longitudinal studies on the landscape of twentieth century social and behavioral science cannot be overstated The field of life course studies has grown exponentially since its inception in the 1950s and now influences methodologies as well as expectations for all academic research Looking at Lives offers an unprecedented insider s view into the intentions methods and findings of researchers engaged in some of the 20th century s landmark studies In this volume eminent American scholars many of them pioneers in longitudinal studies provide frank and illuminating insights into the difficulties and the unique scientific benefits

of mounting studies that track people's lives over a long period of time. Looking at Lives includes studies from a range of disciplines including psychology, sociology, and education, which together cover a span of more than fifty years. The contributors pay particular attention to the changing historical, cultural, and scientific context of their work, as well as the theoretical and methodological changes that have occurred in their fields over decades. What emerges is a clear indication of the often unexpected effects these studies have had on public policies and public opinion, especially as they relate to such issues as the connection between poverty and criminal behavior or the consequences of teen-age pregnancy and drug use for inner-city youth. For example, David Weikart reveals how his long-term research on preschool intervention projects begun in 1959 permitted him to show how surprisingly effective preschool education can be in improving the lives of disadvantaged children. In another study, John Laub and Robert Sampson build on findings from a groundbreaking study begun by Sheldon and Eleanor Glueck in the 1950s to reveal the myriad ways in which juvenile delinquency can predict criminal behavior in adults. And Arland Thornton, Ronald Freedman, and William Axinn employ an intergenerational study of women and their children begun in 1962 to examine the substantial relaxation of social mores for family and individual behavior in the latter decades of the 20th century. Looking at Lives is full of striking testimony to the importance of long-term longitudinal studies. As a unique chronicle of the origins and development of longitudinal studies in America, this collection will be an invaluable aid to 21st-century investigators who seek to build on the successes and the experiences of the pioneers in life-course studies.
