attempts to build an enormous Columbiad space gun and launch three people the Gun Club's president his Philadelphian armor making rival and a French poet in a projectile with the goal of a Moon landing Five years later Verne wrote a sequel called *Around the Moon* The story is also notable in that Verne attempted to do some rough calculations as to the requirements for the cannon and in that considering the comparative lack of empirical data on the subject at the time some of his figures are remarkably accurate However his scenario turned out to be impractical for safe manned space travel since a much longer barrel would have been required to reach escape velocity while limiting acceleration to survivable limits for the passengers The character of Michel Ardan the French member of the party in the novel was inspired by the real life photographer Flix Nadar The story opens some time after the end of the American Civil War The Baltimore Gun Club a society dedicated to the design of weapons of all kinds especially cannons comes together when Impey Barbicane its president calls them to support his latest idea He's done some calculations and believes that they could construct a cannon capable of shooting a projectile to the Moon After receiving the support of his companions another meeting is held to decide the place from which the projectile will be fired the dimensions and materials of both the cannon and the projectile and which kind of powder they are to use An old enemy of Barbicane a Captain Nicholl of Philadelphia designer of plate armor declares that the entire enterprise is absurd and makes a series of bets with Barbicane each of them of increasing amount over the impossibility of such feat The first obstacle the money to construct the giant cannon and against which Nicholl has bet 1 000 dollars is raised from a number of countries in America and Europe Notably the U S gives four million dollars while England does not give a farthing but in the end nearly five and a half million dollars are raised which ensures the financial feasibility of the project Stone's Hill in Tampa Town Florida is chosen as the site for the cannon's construction The Gun Club travels there and starts the construction of the Columbiad cannon which requires the excavation of a 900 foot deep 270 m and 60 foot wide 18 m circular hole which is made in the nick of time but a surprise awaits Barbicane Michel Ardan a French adventurer plans to travel aboard the projectile During a meeting between Ardan the Gun Club and the inhabitants of Florida Nicholl appears and challenges Barbicane to a duel The duel is stopped when Ardan having been warned by J T Maston secretary of the Gun Club meets the rivals in the forest where they have agreed to duel Meanwhile Barbicane finds the solution to the problem of surviving the incredible acceleration that the explosion would cause Ardan suggests that Barbicane and Nicholl travel with him in the projectile and the proposition is accepted In the end the projectile is successfully launched but the destinies of the three astronauts are left inconclusive The sequel *Around the Moon* deals with what happens to the three men in their travel from the Earth to the Moon
