Les Théories De La Motivation Psychologie Cognitive:

Les théories de la motivation Fabien Fenouillet, 2012 La motivation permet d'expliquer la dynamique du comportement humain. Rares sont les phénomènes psychologiques qui lui échappent. Que ce soit en formation au travail ou pour l'étude des mécanismes cognitifs, la motivation s'avère souvent éclairante pour comprendre d'innombrables activités humaines. Il existe à l'heure actuelle au moins 101 théories motivationnelles, ce qui fait de ce concept un univers complexe appréhender. L'objectif de cet ouvrage est double. D'une part, il s'agit de présenter un modèle intégré de la motivation. Ce modèle permet de montrer qu'il est possible de faire des ponts entre les concepts théoriques et ainsi d'organiser cette immense galaxie qui est la motivation. D'autre part, il s'agit de présenter individuellement les grands principes de 101 théories motivationnelles et de replacer chaque théorie dans le cadre du modèle intégré. **Grand manuel de psychologie de la motivation - 2e éd.**

Philippe Carré, Fabien Fenouillet, 2024-01-24 Cette 2^e édition actualisée et augmentée synthétise l'ensemble des savoirs théoriques et pratiques sur la motivation. Véritable état des savoirs sur ce champ de recherche, elle fait le point sur les perspectives théoriques et les implications pratiques de ce concept majeur de la psychologie. Theories of Motivation; from Mechanism to Cognition Bernard Weiner, 1972

Cognitive Motivation David Beswick, 2017 Motivation and cognition were treated as separate concepts throughout most of twentieth century psychology. However in recent years researchers have begun viewing the two as inextricably intertwined: not only does what we want affect how we think, but how we think affects what we want. In this innovative study, Beswick presents a new general theory of cognitive motivation synthesizing decades of existing research in social cognitive and personality psychology. New basic concepts are applied to a wide range of purposive behaviour. Part I of the volume reviews different forms of cognitive motivation such as curiosity, cognitive dissonance, achievement motivation, and the search for purpose and meaning, while Part II examines the basic processes that underlie it such as working memory, attention, and emotion. The central concept is the incomplete gestalt in which motivation is generated by a universal striving to integrate information and make sense at all levels of cognitive organization.
