Churchill,2016-04-15 This investigation contributes to the existing scholarship on women and medicine in early modern Britain by examining the diagnosis and treatment of female patients by male professional medical practitioners from 1590 to 1740 In order to obtain a clearer understanding of female illness and medicine during this period this study examines ailments that were specific and unique to female patients as well as illnesses and conditions that afflicted both female and male patients Through a qualitative and quantitative analysis of practitioners records and patients writings such as casebooks diaries and letters an emphasis is placed on medical practice Despite the prevalence of females amongst many physicians casebooks and the existence of sex based differences in the consultations diagnoses and treatments of patients there is no evidence to indicate that either the health or the medical care of females was distinctly disadvantaged by the actions of male practitioners Instead the diagnoses and treatments of women were premised on a much deeper and more

NPE* A story guide for unexpected DNA discoveries Leeanne R. Hay, 2021-10-15
Genealogy is a fun hobby until the results of a consumer DNA test reveal a devastating secret. NPE: A STORY GUIDE FOR UNEXPECTED DNA DISCOVERIES is an authentic resource for people uncovering a new identity, their loved ones, and genealogists who encounter NPEs in a family tree. There is no more fundamental human need than to belong first to a family and then to others. My story and research over three years provide information and support to guide readers. Relatable insights and true stories are presented that address the initial shock of discovery, suggestions about communications, new ethnicities, family recognitions and rejections, and the history of illegitimacy. NPEs are found in all races, religions, and socio-economic groups in every country where consumer DNA tests are sold. By 2022, 142 million people worldwide will take DNA tests for genealogy and medical information. Ten to fifteen percent will discover they are NPE like me. Non-paternity event is a genetic genealogy term for a break in the family line name when your Dad is not your biological father.
