

Dear Parents,

We are establishing a new behavior system in our classroom. I am hoping this will make the students more accountable for the behaviors they should be demonstrating in school. Every day the students will start on the color green. If the students are not making good choices they will have to move their color to yellow, then orange, and finally red. But if the student is going above and beyond in behavior they are able to move their color to blue. Throughout the day the students will have the opportunity to move their color back to green if they are showing good behavior. At the end of the day if the students are on yellow, orange, or red, I will write you a note telling you what the child did to earn that color. Here are the colors and what they mean:

**Blue:** Awesome behavior (gets to go to treasure box)

**Green:** Good Behavior

**Yellow:** Warning

**Orange:** 5 minutes of timeout in social centers

**Red:** No social centers and a phone call home

Please sign if you agree with and understand the new behavior system.

## **Letter To Parents About Behavior:**

Implementing Positive Behavior Support Systems in Early Childhood and Elementary Settings Melissa Stormont, 2008

The book's strengths are its practical information and the specific ways of looking at expectations and developing a common language. The forms included will be of great benefit to school teams. Susan Safarik, Supervisor, Department of Special Education, Lincoln Public Schools NE. Provides a lot of research and breaks down the processes for implementing positive behavior supports effectively in schools. Step by step directions, sample forms, and examples make the processes easy to incorporate and understand. Julia DeGarmo, Special Education Specialist, Columbus City Schools OH. Learn how to teach and support appropriate behavior and build confidence in young children. This easy to read resource presents the Programwide Schoolwide Positive Behavioral Support (PW-SWPBS) system, a preventive research-based approach that helps educators teach classroom behavior skills the same way they teach academic skills. The authors outline the PW-SWPBS model, describe the core practices, and provide case examples to aid implementation. Key features of this instruction-based system include: Differing levels of intervention to meet individual student needs; Clearly stated behavioral expectations; Consistent acknowledgment of students' mastery of expectations; Systematic use of consequences for problem behavior. This user-friendly text makes the principles of PW-SWPBS easy to apply for educators who are committed to helping young students establish positive behavioral habits that will make learning a joy for all.

**Handbook of Behavior Therapy in Education** S.N. Elliott, F. Gresham, J.C. Witt, 2013-11-11. What do we know about behavioral analysis and intervention in educational settings? Given that educational institutions were among the first to embrace the new technology of behavior change in the late 1950s and early 1960s, it is apparent that we have had the opportunity to learn a great deal. The evolution of the field of behavior therapy has witnessed a change in the behavior therapist from an adolescent fascination with repeatedly demonstrating the effectiveness of the new technology to a mature

recognition of the complex implications of the behavioral paradigm for individuals, systems, and society. Many facts now taken for granted were considered impossibilities a mere two decades ago. In her 1986 presidential address to Division 25 of the American Psychological Association, Beth Sulzer-Azaroff reviewed a number of changes in attitude in education that were strongly influenced by behavior therapy. Most educators now agree that a) everyone can learn, b) complex skills can be taught, c) precise general and durable performance can be taught, and d) barriers to learning can be overcome. In addition, we would add that behavior therapy is being applied to increasingly more complex human problems such as social skill deficits, internalizing disorders, and dysfunctional systems and organizations. *Daily Behavior Report Cards* Robert J. Volpe, Gregory A. Fabiano, 2013-01-16

This book presents everything needed to design and implement daily behavior report cards (DRCs), a flexible and dynamic system for promoting positive student behaviors and overcoming barriers to learning. DRCs offer a way to reward K-12 students for achieving clearly defined goals while building school-home collaboration. Teachers can implement the authors' evidence-based approach in just minutes a day, and it is fully compatible with multi-tiered systems of support. In a convenient large-size format, the book includes helpful reproducible forms. Purchasers get access to a Web page where they can download the reproducible forms and have the option to fill in forms on screen before printing, plus additional useful tools for charting student progress. This book is in *The Guilford Practical Intervention in the Schools Series*, edited by Sandra M. Chafouleas.

**Classroom Management that Works** Robert J. Marzano, Jana S. Marzano, Debra Pickering, 2003. In this follow-up to the popular *What Works in Schools*, Robert J. Marzano discusses the research-based strategies that every teacher can use to effectively manage the classroom and help students take responsibility for their own behavior. **Rapid**

 refers to the systematic analysis and change of human behavior and the principal focus is on overt behavior and its  
 relationships to environmental variables Behavior modification can be applied in many settings the nature of which helps to  
 define its subsets Thus applied in clinical settings toward clinical goals it encompasses the subset behavior therapy In  
*Behavior Therapy with Children Volume 2* Anthony M Graziano focuses on behavior therapy specifically the behavioral  
 treatment of children's clinical problems The field of behavior modification encompasses an astonishingly wide and varied  
 spectrum of concepts about and approaches to education clinical problems social programming and rehabilitation efforts A  
 conceptually and technologically rich medium it has been nourished by the psychology laboratory the school and the  
 psychiatric clinic It is an area with diffuse boundaries surrounding a highly active center within which apparently solid  
 landmarks have already been worn away by the dissolving action of corrective self criticism immeasurably aided by the  
 catalysts stirred in by the field's many critics The activity continues the dynamic field boils and the medium enriches itself  
 There appears to be a tendency particularly among new behavior therapists to limit their focus too narrowly to the client's  
 systems of overt behavior In this project psychological therapy begins with a personal interactive social situation in which the  
 generally expected human response of interest sympathy and support is the minimum condition Graziano maintains that  
 these clinical sensitivity skills must be preserved in behavior therapy and enhance its important contribution to advancing  
 the therapeutic endeavor Anthony M Graziano is professor emeritus in the Department of Psychology State University of New  
 York at Buffalo He has published a number of articles in journals on subjects such as teaching machine programs behavior  
 therapy with children diagnostic testing the history of psychology and evaluations of the contemporary mental health  
 professions He has been on the editorial board of *Behavior Modification* and on the board of directors for the Eastern
