Apartheid South Africa was often thought to run in the interests of the business elite Yet 27 years after apartheid those business interests remain largely entrenched Why Did the South African business community play a role in engineering this outcome perhaps recognising the apartheid era was over and jumping ship in time Conversely the mission of the ANC was widely perceived to be to shift wealth and power into the hands of the whole community Yet despite black empowerment measures corporate ownership remains largely in white hands and certainly in the hands of an elite few even though no longer restricted to whites This picture is replicated across the global south where corporate ownership tends to be concentrated in the hands of an elite rather than being more democratically spread Why have alternative corporate forms not been pursued more vigorously with ownership in the hands of customers employees and local communities In the case of South Africa where the majority of customers and employees are black this could have delivered on the ANC s mission to replace the apartheid era with a democratic one in terms of wealth incomes and power as well as in terms of voting and civic rights This edited volume explores all these questions and looks at ways to align corporate forms with economic and social goals The chapters in this book were originally published as special issues of International Review of Applied Economics

Babel Unbound Lesley Cowling,Carolyn Hamilton,2020-05-01 In this timely original and sophisticated collection writers from the Global South demonstrate that forms of publicness are multiple mobile and varied The notion that societies mediate issues through certain kinds of engagement is at the heart of imaginings of democracy and often centers on the ideal of the public sphere But this imagined foundation of how we live collectively appears to have suffered a dramatic collapse across the world with many democracies apparently unable to solve problems through talk or even to agree on who speaks in what ways and where In the 10 essays in this timely original and sophisticated collection writers from southern Africa combine theoretical analysis with the examination of historical cases and contemporary developments to demonstrate that forms of publicness are multiple mobile and varied They propose new concepts and methodologies to analyse how public engagements work in society Babel Unbound examines charged examples from the Global South such as the centuries old Timbuktu archive Nelson Mandela as a powerful absent presence in 1960s public life and the challenges to the terms of contemporary debate around the student activism of rhodesmustfall and feesmustfall These show how issues of public discussion span both archive and media verbal debates in formal spaces and visual performances that circulate in unpredictable ways

Unsettling Apologies Melanie Judge,Dee Smythe,2022-09-29 There has recently been a global resurgence of demands for the acknowledgement of historical and contemporary wrongs as well as for apologies and reparation for harms suffered Drawing on the histories of injustice dispossession and violence in South Africa this book examines the cultural political and legal role and value of an apology It explores the multiple ways in which sorry is instituted articulated and performed and

critically analyses its various forms and functions in both historical and contemporary moments Bringing together an interdisciplinary team of contributors the book s analysis offers insights that will be invaluable to global debates on the struggle for justice The Spirit of Marikana Luke Sinwell,Siphiwe Mbatha,2016-07-20 On 16th August 2012 thirty four black mineworkers were gunned down by the police under the auspices of South Africa s African National Congress ANC in what has become known as the Marikana massacre This attempt to drown independent working class power in blood backfired and is now recognised as a turning point in the country s history The Spirit of Marikana tells the story of the uncelebrated leaders at the world s three largest platinum mining companies who survived the barrage of state violence intimidation torture and murder which was being perpetrated during this tumultuous period What began as a discussion about wage increases between two workers in the changing rooms at one mine became a rallying cry for economic freedom and basic dignity This gripping ethnographic account is the first comprehensive study of this movement revealing how seemingly ordinary people became heroic figures who transformed their workplace and their country Organise or Die? Raphaël Botiveau,2017-12-01 The story of one of the leading trade unions in South Africa the National Union of Mineworkers and its role in the struggle against white minority rule Organise or Die Democracy and Leadership in South Africa s National Union of Mineworkers NUM is the first in depth study of one of the leading trade unions in the country Founded in 1982 the trade union played a key role in the struggle against white minority rule before turning into a central protagonist of the ruling Tripartite Alliance after apartheid Deftly navigating through workerist social movement and political terrains that shape the South African labour landscape this book sheds light on the path that led to the unprecedented 2012 Marikana massacre the dissolution of the Congress of South African Trade Unions Cosatu federation and to fractures within the African National Congress ANC itself Working with the notions of organisational agency and strategic bureaucratisation Raphaël Botiveau shows how the founding leadership of NUM built their union s structures with a view to mirror those of the multinational mining companies NUM faced Good leadership proved key to the union s success in recruiting and uniting mineworkers and NUM became an impressive school for union and political cadres producing a number of South Africa s top post apartheid leaders An incisive analysis of leadership styles and strategies shows how the fragile balance between an increasingly distant leadership and an increasingly militant membership gradually broke down Botiveau provides a compelling narrative of NUM s powerful history and the legacy of its leadership It will appeal to a broad readership including journalists students and social sciences scholars interested in South Africa s contemporary politics and labour history

Land, Law and Chiefs in Rural South Africa William Beinart,Rosalie Kingwill,Gavin Capps,2021-05-01 This edited collection illustrates contestations over land and political authority in South Africa s rural areas focusing on threats to popular rights and how they are being supported Who controls the land and minerals in the former Bantustans of South Africa chiefs the state or landholders Disputes are taking place around the ownership of resources decisions about their

exploitation and who should benefit With respect to all of these issues the courts have become increasingly important The contributors to *Land Law and Chiefs in Rural South Africa* capture some of these intense contestations over land law and political authority focussing on threats to the rights of ordinary people History and customary law feature strongly in most disputes and succession to chieftaincy is also frequently disputed Judges have to make decisions in a context where rival claimants to property or office assert their own versions of history and custom The South African constitution recognizes customary law and the courts are attempting to incorporate and develop this branch of jurisprudence as living customary law Lawyers community leaders and academics are called on to assist in researching cases around restitution land rights and customary law The chapters in this collection discuss legal cases and policy directions that have evolved since 1994 Some chapters analyze the increasing power of chiefs in the South African rural areas while others suggest that the courts are giving support to popular rights over land and supporting local democratic processes Contributors record significant pushback from groups that reject traditional authority These political tensions are a central theme of the collection and thus serve as vital case studies in furthering our understanding of rights and restitution in South Africa

Freedom Is Power Lawrence Hamilton, 2014-07-31 Using the history of political thought and real world political contexts including South Africa and the recent global financial crisis this book argues that power is integral to freedom It demonstrates how freedom depends upon power and contends that liberty for all citizens is best maintained if conceived as power through political representation Against those who de politicise freedom through a romantic conception of the people and faith in supposedly independent judicial and political institutions Lawrence Hamilton argues that real modern freedom can only be achieved through representative and participative mechanisms that limit domination and empower classes and groups who become disempowered in the conflicts that inevitably pervade politics This is a sophisticated contribution to contemporary political theory that will be of interest to scholars and students of history politics philosophy economics sociology development studies and Southern African studies

The Chemical Engineer, 2008 **New Forms of Worker Organization** Immanuel Ness, 2014-07-01 Bureaucratic labor unions are under assault. Most unions have surrendered the achievements of the mid twentieth century when the working class was a militant force for change throughout the world. Now trade unions seem incapable of defending let alone advancing workers interests. As unions implode and weaken workers are independently forming their own unions drawing on the tradition of syndicalism and autonomism a resurgence of self directed action that augurs a new period of class struggle throughout the world. In Africa Asia the Americas and Europe workers are rejecting leaders and forming authentic class struggle unions rooted in sabotage direct action and striking to achieve concrete gains. This is the first book to compile workers struggles on a global basis examining the formation and expansion of radical unions in the Global South and Global North. The tangible evidence marshaled in this book serves as a handbook for understanding the formidable obstacles and concrete opportunities for workers challenging neoliberal capitalism even as the unions of the old decline and disappear.
