Losing The Map:

Maps Lost Evelyn Foster, AI, 2025-03-03 *Maps Lost* explores the fascinating history of cartographic errors and their profound impact on world history. It reveals how flawed maps have shaped exploration, fueled territorial disputes, and redefined our understanding of the world. The book highlights that maps are not objective truths but interpretations influenced by political agendas and the limitations of geographic knowledge at the time. For example, the persistent appearance of mythical islands on early maps of the Atlantic spurred many voyages of fruitless exploration. The book adopts a critical cartographic approach, challenging the notion of maps as purely objective tools. It emphasizes that maps are subjective constructions that reflect their creators' biases and historical contexts. *Maps Lost* progresses through a series of compelling case studies examining specific maps and their unintended consequences. These include instances where miscalculations led to the search for the Northwest Passage and politicized mappings of contested territories. Ultimately, *Maps Lost* argues that cartographic errors, while often viewed as failures, have paradoxically driven exploration, discovery, and the expansion of geographic knowledge. It equips readers with the tools for cartographic literacy, encouraging them to critically analyze maps and understand their role in shaping our perception of the world.

The Routledge Handbook of Mapping and Cartography Alexander Kent, Peter Vujakovic, 2017-10-04 This new Handbook unites cartographic theory and praxis with the principles of cartographic design and their application. It offers a critical appraisal of the current state of the art, science, and technology of map making in a convenient and well-illustrated guide that will appeal to an international and multi-disciplinary audience. No single volume work in the field is comparable in terms of its accessibility, currency, and scope. The Routledge Handbook of Mapping and Cartography draws on the wealth of new scholarship and practice in this emerging field, from the latest conceptual developments in mapping and advances in map making technology to reflections on the role of maps in society. It brings together 43 engaging chapters on a diverse range of topics, including the history of cartography, map use and user issues, cartographic design, remote sensing, volunteered geographic information (VGI), and map art. The title's expert contributions are drawn from an international base of influential academics and leading practitioners, with a view to informing theoretical development and best practice. This new volume will provide the reader with an exceptionally wide-ranging introduction to mapping and cartography and aim to inspire further engagement within this dynamic and exciting field. The Routledge Handbook of Mapping and Cartography offers a unique reference point that will be of great interest and practical use to all map makers and students of geographic information science, geography, cultural studies, and a range of related disciplines.

Lost Maps of the Caliphs

Yossef Rapoport,Emilie Savage-Smith,2018-12-11 About a millennium ago in Cairo an unknown author completed a large and richly illustrated book In the course of thirty five chapters this book guided the reader on a journey from the outermost cosmos and planets to Earth and its lands islands features and inhabitants This treatise known as The Book of Curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 Lost Maps of the Caliphs provides the first general overview of The Book of Curiosities and the unique insight it offers into medieval Islamic thought Opening with an account of the remarkable discovery of the manuscript and its purchase by the Bodleian Library the authors use The Book of Curiosities to re evaluate the development of astrology geography and

cartography in the first four centuries of Islam Their account assesses the transmission of Late Antique geography to the Islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval Islamic plans of towns and ports Early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on Earth Lost Maps of the Caliphs also reconsiders the history of global communication networks at the turn of the previous millennium It shows the Fatimid Empire and its capital Cairo as a global maritime power with tentacles spanning from the eastern Mediterranean to the Indus Valley and the East African coast As Lost Maps of the Caliphs makes clear not only is The Book of Curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of Islamic civilization that opens an unexpected window to the medieval Islamic view of the world **DK**
