*Deterritorializing/Reterritorializing* Nancy Ares, Edward Buendía, Robert Helfenbein, 2017-05-10 This volume features scholars who use a critical geography framework to analyze how constructions of social space shape education reform In particular they situate their work in present day neoliberal policies that are pushing responsibility for economic and social welfare as well as education policy and practice out of federal and into more local entities States cities and school boards are being given more responsibility and power in determining curriculum content and standards accompanied by increasing privatization of public education through the rise of charter schools and for profit organizations incursion into managing schools Given these pressures critical geography s unique approach to spatial constructions of schools is crucially important Reterritorialization and deterritorialization or the varying flows of people and capital across space and time are highlighted to understand spatial

forces operating on such things as schools communities people and culture Authors from multiple fields of study contribute to this book s examination of how social political and historical dimensions of spatial forces especially racial ethnic and other markers of difference shape are shaped by processes and outcomes of school reform

**Liberal Quicksand** Yves Decock,2016-01-22 According to a fairy tale after World War II Europe rejected nationalism and subsequently started the European project which brought uninterrupted peace from 1945 on In this book this version of history is unmasked First Europe did not desert nor transcend nationalism after 1945 On the contrary since 1800 the nationalist program based on linguistic divisions has been implemented continuously also after the end of World War II Not

the rejection of the nationalist program but its nearly full implementation is the basis of the lasting peace in Europe since 1945 The delineation of linguistically homogeneous territories is the precondition to create a truly Lockean democracy Second nationalism is by itself in the first place a strong emancipatory force that is intrinsically connected with the liberal evolutions at the end of the eighteenth and the midst of the nineteenth century A correct appreciation of the emancipatory role of nationalism and of the contribution of nationalism to the current structure of Europe is a necessity to be able to deal adequately with the issues the modern world is thrusting upon Europe and to assess the form a political entity Europe might take The European experience raises the question whether another path is possible Throughout its history the USA has followed the European path and has remained fundamentally Anglo Saxon until 1965 Since then the USA is struggling how to deal with its multicultural and multilingual reality and hesitates between an English only mode following the European model or something else currently still not yet clearly defined And what are the implications of Europes history when applied to the Middle East or multinational states like China Can they democratize without falling apart      *Research in Education* ,1972
