have been concerned about the state of education in the United States Discover their thoughts on how children really learn
and what teachers must do to optimally tap children s latent abilities During the last three decades education reformers have
pushed standardized testing and policies like No Child Left Behind and Common Core to improve test scores and proficiency
in basic skills However during this period that author Thomas Armstrong calls the miseducation of America a number of
troubling trends have surfaced including a decrease in creative thinking scores among children in kindergarten through third
grade Rather than focus on what s wrong with the education system that has produced these outcomes Armstrong lays out
what creative thinkers know about how children should be educated In an extended thought experiment he asks what would
happen if we turned the reins of educational policy over not to the politicians and educational bureaucrats but to eminent
thinkers and creators like Albert Einstein Pablo Picasso Martin Luther King Jr Rachel Carson Doris Lessing Jane Goodall and
other seminal culture builders What might they say about the best way to educate a child If Einstein Ran the Schools
suggests that the answers to this intriguing question should guide future efforts to reform our nation s schools Who's who
