Memorandum Of November2010 Question2 Engineering Science N:

Scientific advice and evidence in emergencies Great Britain: Parliament: House of Commons: Science and Technology Committee,Andrew Miller,2011-03-02 In this report the Science and Technology Committee examines how scientific advice and evidence is used in national emergencies when the Government and scientific advisory system are put under great pressure to deal with atypical situations The inquiry focused on four case studies i the 2009 10 H1N1 influenza pandemic swine flu ii the April 2010 volcanic ash disruption iii space weather and iv cyber attacks While science is used effectively to aid responses to emergencies the detachment of the Government Chief Scientific Adviser GCSA from the National Risk Assessment NRA the key process of risk evaluation carried out by the Cabinet Office is a serious concern The Committee recommends that the NRA should not be signed off until the GCSA is satisfied that all risks requiring scientific input and judgements have been properly considered A new independent scientific advisory committee should be set up to advise the Cabinet on risk assessment and review the NRA The Icelandic volcanic eruption in April 2010 is a stark example of the lack of scientific input in risk assessment the risk of disruption to aviation caused by a natural disaster was dropped from the assessment process in 2009 despite warnings from earth scientists There are concerns over how risk was communicated to the public during the 2009 10 swine flu pandemic are raised in the report with sensationalised media reporting about the projected deaths from swine flu The Scientific Advisory Groups in Emergencies set up to advise government during emergencies were found to work in an unnecessarily secretive way

elaborated a distinctive Northern natural order of violent ionospheric storms and auroral displays and linked it to a machinic order of severe and widespread radio disruptions throughout the country Tracking their efforts through scientific images experimental satellites clandestine maps and machine architectures he argues that these scientists naturalized Canada's technological vulnerabilities as part of a program to reimagine the postwar nation The real and potential failures of machines came to define Canada its hostile Northern nature its cultural anxieties and its geo political vulnerabilities during the early Cold War Jones Imhotep's study illustrates the surprising role of technological failures in shaping contemporary understandings of both nature and nation
