

Making Salts From Metal Carbonates

Adding a metal carbonate or a metal hydrogen carbonate to an acid produces a salt, carbon dioxide and water.

acid	+	metal carbonate	➡	a salt	+	carbon dioxide	water
------	---	--------------------	---	--------	---	-------------------	-------

hydrochloric acid	+	calcium carbonate	➡	calcium chloride	+	carbon dioxide	water
----------------------	---	----------------------	---	---------------------	---	-------------------	-------

hydrochloric acid	+	sodium hydrogen carbonate	➡	sodium chloride	+	carbon dioxide	water
----------------------	---	---------------------------------	---	--------------------	---	-------------------	-------

Metal carbonates contain a carbonate ion (CO_3^{2-}) and therefore this reaction with acid is often used as a chemical test for this ion.

Metal Carbonates Isa

ML Morrison

Metal Carbonates Isa:

Thank you for reading **Metal Carbonates Isa**. As you may know, people have look numerous times for their chosen readings like this Metal Carbonates Isa, but end up in malicious downloads.
