Metric Time Table 2014 June:

Game of Loans Beth Akers, Matthew M. Chingos, 2018-05-29 Why fears about a looming student loan crisis are unfounded and how they obscure what's really wrong with student lending College tuition and student debt levels have been rising at an alarming pace for at least two decades These trends coupled with an economy weakened by a major recession have raised serious questions about whether we are headed for a major crisis with borrowers defaulting on their loans in unprecedented numbers and taxpayers being forced to foot the bill *Game of Loans* draws on new evidence to explain why such fears are misplaced and how the popular myth of a looming crisis has obscured the real problems facing student lending in America Bringing needed clarity to an issue that concerns all of us Beth Akers and Matthew Chingos cut through the sensationalism and misleading rhetoric to make the compelling case that college remains a good investment for most students They show how in fact typical borrowers face affordable debt burdens and argue that the truly serious cases of financial hardship portrayed in the media are less common than the popular narrative would have us believe But there are more troubling problems with student loans that don't receive the same attention They include high rates of avoidable defaults by students who take on loans but don't finish college the riskiest segment of borrowers and a dysfunctional market where competition among colleges drives tuition costs up instead of down Persuasive and compelling *Game of Loans* moves beyond the emotionally charged and politicized talk surrounding student debt and offers a set of sensible policy proposals that can solve the real problems in student lending

Digital Media and Democratic Futures Michael X. Delli Carpini, 2019-02-14 The revolution in digital communications has altered the relationship between citizens and political elites with important implications for democracy As new information ecosystems have evolved as unforeseen examples of their positive and negative consequences have emerged and as theorizing data and research methods have expanded and improved the central question has shifted from if the digital information environment is good or bad for democratic politics to how and in what contexts particular attributes of this environment are having an influence It is only through the careful analysis of specific cases that we can begin to build a more comprehensive and nuanced understanding of the role of digital media in democratic theory and practice The essays in Digital Media and Democratic Futures focus on a variety of information and communication technologies politically relevant actors substantive issues and digital political practices doing so from distinct theoretical perspectives and methodological approaches Individually each of these case studies provides deep insights into the complex and context dependent relationship between media and democracy Collectively they show that there is no single outcome for democracy in the digital age only a range of possible futures Contributors Rena Bivens Michael X Delli Carpini Jennifer Earl Thomas Elliott Deen Freelon Kelly Gates Philip N Howard Daniel Kreiss Ting Luo Helen Nissenbaum Beth Simone Noveck Jennifer Pan Lisa Poggiali Daniela Stockmann
