Observational Listening Markus van Alphen, 2016-07-27 Conversational skills People already talk with one another dont they It should be redundant to write a book about conversational skills or so you would think Yet there are differences between people one seems to get a little more done than the next Often this boils down to subtle differences in the way they communicate Ordinarily people tend to ask questions with a certain goal or purpose in mind They then listen to the answer as if the answer is based on the question as they meant it to be Yet the other is answering based on what he understood the question to mean Observational listening trains the listener to let go of his own goals and interpretations and concentrate on the reactions evoked In other words the listener tries to find out what the question meant to the other In this way he gets it and is able to bring depth into the conversation in a natural way without resorting to tricks This book also goes further than your everyday conversation it is directed at conversational skills in psychosocial settings The philosophy behind the book is simple yet profound if you realise that communication is an emotion as well as the expression of emotion the way to becoming an excellent communicator is to understand emotion and how it translates into behaviour This is what makes this book unique it provides the missing link between emotion and communication The Empathy Factor Marie R.

Miyashiro, 2011 Building on research in brain science emotional intelligence and organisational theory this title answers questions about the true definition of empathy It presents an exploration into business productivity and office management that offers both real world insights and practical ways to build transformative empathy skills organisation wide Publisher description *Embodied Communication in Humans and Machines* Ipke Wachsmuth, Manuela Lenzen, Günther Knoblich, 2008-09-04 Communication is not just about the transfer of verbal information Gestures facial expressions intonation and body language are all major sources of information during conversation This book presents a new perspective on communication one that will help us to better understand humans and also to build machines that can communicate
