

WHAT IS ISO 14001:2004 EMS Standard?

An ISO 14001 EMS addresses the impact of a company's activities, products and services on the environment. The EMS provides a formalized structure for ensuring that environmental concerns are addressed, and works to both control a company's significant environmental impacts and achieve regulatory compliance.

The ISO 14000 family includes most notably the ISO 14001 standard, which represents the core set of standards used by organizations for designing and implementing an effective environmental management system. Other standards included in this series are ISO 14004, which gives additional guidelines for a good environmental management system, and more specialized standards dealing with specific aspects of environmental management. Essentially, the standards are concerned with what an organization does to minimize harmful effects on the environment caused by its activities: either during production or disposal, either by pollution or by depleting natural resources.

Providing ISO 14001 consulting, Training and Certification facilitation services across the world.
