**Integrating Virtual and Traditional Learning in 6-12 Classrooms** Sandra Schamroth Abrams, 2014-09-19 Integrating Virtual and Traditional Learning in 6-12 Classrooms introduces a model of layered literacies as a framework for describing and illustrating how students' digital experiences can inform educational methods. Through the

lens of layered literacies educators can envision opportunities to draw upon adolescents out of school interests and activities to meaningfully integrate digital practices within academic contexts Such an approach facilitates innovative teaching inspired learning and successful pedagogy and it thoughtfully highlights the role of technology within mandated standards based instruction in public schools Combining foundational and contemporary theories supported by data from multiple studies of adolescent learning and honoring teachers and students experiences and resources this text helps educators reconceptualize the ways students learn through and with digital texts and negotiate the connection between online and offline spaces A companion website extends the discussion onto the screen engaging readers in an intertextual approach to learning that complements the concept of layering literacies across disciplines With a foreword by Jennifer Rowsell and an afterword by Bill Cope and Mary Kalantzis it will be of interest to experienced educators and administrators as well as postgraduate graduate and undergraduate students of education
