Temperature is how **hot** or **cold** something is.

A thermometer is a tool used to measure temperature.

A thermometer can be used to tell how hot or cold it is outside. It can tell if you have a fever. It can tell the temperature inside your house.

Thermal Energy

The energy of moving particles is called thermal energy. The more thermal energy an object has, the faster the particles move. Thermal energy flows from objects to cool objects.

A cool object gains heat from a warmer object.
