From Additive Manufacturing to 3D/4D Printing 1

Jean-Claude André, 2017-10-30 In 1984, additive manufacturing represented a new methodology for manipulating matter, consisting of harnessing materials and/or energy to create three-dimensional physical objects. Today, additive manufacturing technologies represent a market of around 5 billion euros per year, with an annual growth between 20 and 30%. Different processes, materials, and dimensions, from nanometer to decameter, within additive manufacturing techniques have led to 70 000 publications on this topic and to several thousand patents with applications as wide-ranging as domestic uses. Volume 1 of this series of books presents these different technologies with illustrative industrial examples. In addition to the strengths of 3D methods, this book also covers their weaknesses and the developments envisaged in terms of incremental innovations to overcome them.

Imprimer le monde Marie-Ange Brayer, 2017 l'occasion de l'exposition Imprimer le monde du 15 mars au 19 juin 2017 les éditions HYX et les éditions du Centre Pompidou interrogent avec Imprimer le monde l'émergence dans la création artistique de ce nouvel artefact numérique imprimé en 3D. Les technologies numériques ont bouleversé la conception et la fabrication des objets, transformant la pratique des designers, des architectes et des artistes. Quel est le statut de l'auteur ? le rôle de la production de ces objets non standards, la fois uniques et produits industriellement ? Quel est le statut de cet objet ?
