Factor Impact Journal 22:

An ex-post impact assessment of IFPRI's GRP22 program, Water Research Allocation Bennett, Jeffrey W., 2013-04-10 The performance of the International Food Policy Research Institute's IFPRI's research program that focuses on water resource issues is reviewed for the period 1994-2010 around the three themes that constitute the program: global modeling, river basin modeling, and institutions. The IFPRI water team has been involved in leading edge research in a number of dimensions; it has focused on analysis at varying geographic scales; the work has been truly interdisciplinary by engaging economics with biophysical science and other social sciences; and research outputs have been innovative in advancing institutional analysis and water pricing and in policy measures addressing the complexities of water supply management. In the research tasks, IFPRI's water team actively collaborated with a wide range of researchers from within the CGIAR network, national research institutes, and universities. Within the team, a largely stable group of leaders has been responsible for the professional development of a substantial cohort of junior staff who have moved onto successful careers elsewhere. The output of the program has been prolific and prominent in academic, policy, and development communities. The approach taken is to review selected publications from the themes, assess the quality of the journals in which papers have been published, and evaluate the performance on average of researchers in the program. In addition, surveys of stakeholders were carried out, and three specific projects were subjected to detailed review. The assessment demonstrated the high regard in which the program's research outputs and researchers are held. The IFPRI water team has been remarkably productive throughout the 16 years considered, working on issues that are of high relevance to policy and producing work that has largely been cutting edge. However, impacts generated by individual projects were not consistently or readily identifiable. To maximize the benefits of this performance and to overcome challenges associated with securing more outcomes, this report recommends that a more coordinated approach be taken to develop the research project portfolio. This would involve better targeting of projects to policy objectives through a more systematic review of research demand forces and improved integration of research work with policy development processes. The latter, in particular, requires the development of a sense of research project ownership within the policy circles; the research is designed to influence. More effort in the development of in-country research partnerships can aid this process, as local researchers can act as champions within local policy circles. Where government agencies have a research function, their integration into the partnerships is recommended. Avoidance of completing research projects in a policy vacuum is critical but requires both advanced planning of each research project as well as constant adaptation of the work plan to often rapidly evolving policy contexts. To achieve project impacts beyond the immediacy of the specific case study context, a more targeted and coordinated publication strategy should be developed in light of changing publication technology. Project webpages within the IFPRI website, with readily downloadable reports, are useful during the implementation of each project, and more formal papers should be targeted for publication in high impact factor technical

journals with parallel papers prepared for more policy oriented journals that have high circulations The Future of the Academic Journal Bill Cope, Angus Phillips, 2014-07-01 The world of the academic journal continues to be one of radical change A follow up volume to the first edition of The Future of the Academic Journal this book is a significant contribution to the debates around the future of journals publishing The book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years With contributions from leading academics and industry professionals the book provides a reliable and impartial view of this fast changing area The book includes various discussions on the future of journals including the influence of business models and the growth of journals publishing open access and academic libraries as well as journals published in Asia Africa and South America Looks at a fast moving and vital area for academics and publishers Contains contributions from leading international figures from universities and publishers *The Clinical Practice of Drug Information* Michael Gabay, 2015-03-09 This resource will educate students and pharmacists on traditional drug information topics while providing an extensive background on more recent practice areas This is a user friendly text with multiple examples that can be used in education and training as well as clinical practice Each chapter includes learning objectives key terms example *The Subjectivities and Objectivities of Peer Review* Daniel Ucko, 2024-12-16 What do we want Evidence based science When do we want it After peer review We have come to think of peer review as the stamp of quality that separates real results from mere conjecture but a look under the hood reveals that the participants inside of peer review are far from objective This book reclaims subjectivity and affirms a social mode of objectivity which prevents peer review from overpromising and underdelivering in its vital role in knowledge production
