imposed by environmental conditions but also explores the tension that arises between contrasting productive systems with differential abilities to produce surplus. He shows that the near total neglect of short fallow dryland cultivation as well as arboriculture or tree cropping has seriously distorted the picture that archaeologists and anthropologists have of agricultural intensification and its relation to complex social structure. This work, likely to become a classic, will be central to all future discussions of the ecology and politics of agricultural intensification.

**Bokujinkai: Japanese Calligraphy and the Postwar Avant-Garde** Eugenia Bogdanova-Kummer, 2020-07-20 The Bokujinkai or People of the Ink was a group formed in Kyoto in 1952 by five calligraphers: Morita Shiryō, Inoue Yūichi, Eguchi Sōgen, Nakamura Bokushi, and Sekiya Yoshimichi. The avant-garde movement they launched aspired to raise calligraphy to the same level of international prominence as abstract painting. To this end, the Bokujinkai collaborated with artists from European Art Informel and American Abstract Expressionism, sharing exhibition spaces with them in New York, Paris, Tokyo, and beyond. The first English language book to focus on the postwar history of Japanese calligraphy, *Bokujinkai: Japanese Calligraphy and the Postwar Avant-Garde* explains how the Bokujinkai rerouted the trajectory of global abstract art and attuned foreign audiences to calligraphic visualities and narratives.

**A Phonological Grammar of Kenyan Sign Language** Hope E. Morgan, 2022-07-05 This grammar of Kenyan Sign Language (KSL) phonology adds to a sparse literature on the units of categorical form in the world's sign languages. At the same time, it brings descriptive and theoretical research on sign language phonology into better alignment by systematically evaluating current models of sign language phonology for each of the main parameters: handshape, location, and movement, against the KSL data. This grammar also makes a methodological contribution by using a unique dataset of KSL minimal pairs in the analysis, demonstrating that minimal pairs are not as infrequent in sign languages as previously thought. The main content of the book is found in five chapters on handshape, location, core articulatory movement, manner of movement, and other distinctive features, e.g., orientation, mouth actions. The book also contains two large appendices that document the phonological evidence for each of the 44 handshapes and 37 locations. This book will be a key reference for descriptive and typological studies of sign phonology as well as a helpful resource for linguists interested in understanding the similarities and differences between current models of sign phonology and identifying promising avenues for future research.
