

DEPARTMENT OF JUSTICE  
OFFICE OF THE ATTORNEY GENERAL

January 6, 2010

Eric Dover, M.D.  
Portland Health Care  
11705 NE Glisan St.  
Portland, OR 97220

Dear Dr. Dover:

Thank you for your recent correspondence to the Oregon Department of Justice (DOJ), Office of the Attorney General regarding the Oregon Medical Board and the benefits of medical marijuana.

While the Department of Justice does work with state agencies and boards such as the Oregon Medical Board, the Attorney General does not have authority over said agency.

If you wish to pursue process improvement, you may wish to contact the Governor's Office, as the Governor does appoint the heads of state boards and executive agencies. You may contact them at:

Office of the Governor  
160 State Capitol  
900 Court Street  
Salem, Oregon 97301-4047

Additionally, if you feel that this is an issue that may be resolved through changes in Oregon law, you may wish to contact your Legislators. If you are unsure how to contact your Senator or Representative, you can use the "Find Your Legislator" feature on the State of Oregon website at [www.leg.state.or.us](http://www.leg.state.or.us).

I regret that DOJ cannot be directly helpful to you at this time, but wish you luck as you proceed.

Sincerely,

A handwritten signature in cursive script that reads "Kate Medema".

Kate Medema

*What the Doctor Didn't Say* Jerry Menikoff, Edward P. Richards, 2006-08-24 Millions of people each year decide to participate in clinical trials medical research studies involving an innovative treatment for a medical problem For the patient such participation can sometimes be a life saving choice But it can also be just the opposite Our country years ago adopted rules designed to assure that people are making informed choices about participation This book explains the reality behind those rules that our current system of clinical trials hides much of the information patients need to make the right choices Witness the following scenarios Hundreds of patients with colon cancer undergo a new form of keyhole surgery at leading cancer centers never being told that 85% of colorectal surgeons worried that it increases the risk of the cancer returning would not themselves undergo that procedure Tens of thousands of women at high risk of developing breast cancer are asked to participate in a major research study They are told about the option of having both breasts surgically removed but not told about the option of taking a standard osteoporosis pill that might cut the risk of getting breast cancer by one half or more What The Doctor Didn't Say principally written by a nationally prominent expert is the first book to reveal many heretofore hidden aspects about the true nature of participation in clinical trials It shows why options not commonly known including getting a new treatment outside of a research study can often be the best choice It explains how patients can make good decisions even if there is only limited information about a treatment's effect And it does this through the eye opening stories of what is happening daily to thousands of people This book ends up confronting the fundamental dilemma of medical research Participation in clinical trials plays a vital role in advancing knowledge and many experts fear that if the information provided herein became widely known fewer people would participate But the authors demonstrate that there is no need to deceive people into participating in research We can have a system that promotes participation while still providing truthful information to participants
