The Multilingual Challenge for the Construction and Transmission of Scientific Knowledge Anne-Claude Berthoud,Laurent Gajo,2020-11-15 Whereas it is now generally recognised that multilingualism is important for society culture and the economy the relevance of multilingualism for the world of science has still largely escaped attention But science too is created and transmitted in and through communication Today the construction and transmission of knowledge is based on a growing monolingualism with English as the lingua academica regarded as a condition of the universality of scientific knowledge However this idea is based on the illusion that languages are transparent and that the modes of communication are universal In this book it is shown how multilingualism can open different perspectives and improve the quality of knowledge by offering an antidote to the squeezing out of different academic and scientific cultures More precisely it is shown how multilingual approaches highlight the mediating role of language and in doing so optimize conceptualization communication and evaluation in science These findings are for one thing relevant to institutional language policies and for

Andreas Bollin,Gerald Futschek,2022-08-24 This book constitutes the proceedings of the 14th International Conference on Informatics in Schools Situation Evolution and Perspectives ISSEP 2021 held in Nijmegen The Netherlands in November 2020 Due to COVID 19 related travelling restrictions the conference had to be switched to online format The 12 full papers presented together with 4 short papers were carefully reviewed and selected from 57 submissions They are organized in 2 topical sections named state of research and best practice country and experience reports As in our school education

subjects like digital literacy or media literacy are making their way in complementing or partially replacing computer science education. The current ISSEP conference reacted to this trend and therefore invited computer scientists, media didactics and representatives of politics, media and industry to a discussion round on the topic Media Education or Computer Science Quo Vadis School Teaching.

The Mediatization of Culture and Society Stig Hjarvard, 2013-03-12

Mediatization has emerged as a key concept to reconsider old yet fundamental questions about the role and influence of media in culture and society. In particular, the theory of mediatization has proved fruitful for the analysis of how media spread to become intertwined with and influence other social institutions and cultural phenomena like politics, play and religion. This book presents a major contribution to the theoretical understanding of the mediatization of culture and society. This is supplemented by in-depth studies of:

- The mediatization of politics: From party press to opinion industry.
- The mediatization of religion: From the faith of the church to the enchantment of the media.
- The mediatization of play: From bricks to bytes.
- The mediatization of habitus: The social character of a new individualism.

Mediatization represents a new social condition in which the media have emerged as an important institution in society at the same time as they have become integrated into the very fabric of social and cultural life. Making use of a broad conception of the media as technologies, institutions and aesthetic forms, Stig Hjarvard considers how characteristics of both old and new media come to influence human interaction, social institutions and cultural imaginations.
