Fingerprint Attendance System Manual:

Handbook of Fingerprint Recognition Davide Maltoni,Dario Maio,Anil K. Jain,Salil Prabhakar,2006-04-06 A major new professional reference work on fingerprint security systems and technology from leading international researchers in the field Handbook provides authoritative and comprehensive coverage of all major topics concepts and methods for fingerprint security systems This unique reference work is an absolutely essential resource for all biometric security professionals researchers and systems administrators

Handbook of Research on Securing Cloud-Based Databases with Biometric Applications Deka, Ganesh Chandra,2014-10-31 Cloud technologies have revolutionized the way we store information and perform various computing tasks With the rise of this new technology the ability to secure information stored on the cloud becomes a concern The Handbook of Research on Securing Cloud Based Databases with Biometric Applications explores the latest innovations in promoting cloud security through human authentication techniques Exploring methods of access by identification including the analysis of facial features fingerprints DNA dental characteristics and voice patterns this publication is designed especially for IT professionals academicians and upper level students seeking current research surrounding cloud security

Handbook of Research on Technologies and Systems for E-Collaboration During Global Crises Zhao, Jingyuan,Kumar, V. Vinoth,2022-04-08 Necessity is the mother of invention challenging times can provide new opportunities that must be detected and exploited at the right moments The COVID 19 pandemic has demonstrated that it is not only an issue of healthcare but also a challenge for the global economy business and society Organizations have rapidly deployed technology solutions that enable them to work and service remotely and continue most of their normal operations The Handbook of Research on Technologies and Systems for E Collaboration During Global Crises focuses on emerging technologies and systems strategies and solutions for e collaboration This book assesses the importance of technologies and systems for e collaboration in dealing with emerging crises such as pandemics Covering topics such as deep learning processes machine vision and profit sharing models it is an essential resource for computer scientists public officials engineers students and professors of higher education healthcare administration programmers researchers and academicians

Intelligent Techniques in Signal Processing for Multimedia Security Nilanjan Dey,V. Santhi,2016-10-18 This book proposes new algorithms to ensure secured communications and prevent unauthorized data exchange in secured multimedia systems Focusing on numerous applications algorithms and scenarios it offers an in depth analysis of data hiding technologies including watermarking cryptography encryption copy control and authentication The authors present a framework for visual data hiding technologies that resolves emerging problems of modern multimedia applications in several contexts including the medical healthcare education and wireless communication networking domains Further it introduces several intelligent security techniques with real time implementation As part of its comprehensive coverage the book discusses contemporary multimedia authentication and fingerprinting techniques while also proposing

personal authentication recognition systems based on hand images surveillance system security using gait recognition face recognition under restricted constraints such as dry wet face conditions and three dimensional face identification using the approach developed here This book equips perception technology professionals with the latest technologies techniques and strategies for multimedia security systems offering a valuable resource for engineers and researchers working to develop security systems

Proceedings of International Conference on Network Security and Blockchain Technology Jyotsna Kumar Mandal, Biswapati Jana, Tzu-Chuen Lu, Debashis De, 2023-11-28 The book is a collection of best selected research papers presented at International Conference on Network Security and Blockchain Technology ICNSBT 2023 held at Vidyasagar University Midnapore India during March 24-26 2023 The book discusses recent developments and contemporary research in cryptography network security cybersecurity and blockchain technology Authors are eminent academicians scientists researchers and scholars in their respective fields from across the world

Advances in Communication, Devices and Networking Sourav Dhar, Dinh-Thuan Do, Samarendra Nath Sur, Chuan-Ming Liu, 2023-07-07 This book covers recent trends in the field of devices wireless communication and networking It gathers selected papers presented at the 6th International Conference on Communication Devices and Networking ICCDN 2022 which was organized by the Department of Electronics and Communication Engineering Sikkim Manipal Institute of Technology Sikkim India on December 16-17 2022 Gathering cutting edge research papers prepared by researchers engineers and industry professionals it helps young and experienced scientists and developers alike to explore new perspectives and offer them inspirations on how to address real world problems in the areas of electronics communication devices and networking

Proceedings of the E-Learning and Smart Engineering Systems (ELSES 2024) Mohamed Khaldi, Mehdi Kaddouri, Mohamed Erradi, 2025-07-21 This is an open access book The second edition of the ELSES conference under the title Innovative Pedagogical Practices in the Era of Artificial Intelligence dedicated to innovation in pedagogical practices aims to be a platform for reflection exchange and discovery of the opportunities offered by the integration of AI in education In a world of constant technological evolution Artificial Intelligence has emerged as a transformative force capable of redefining the contours of learning and teaching Today we are committed to exploring the frontiers of this transformation discussing the challenges and envisioning the multiple possibilities offered by this convergence between education and technology During this international conference leading experts innovative researchers and key players in education will share their knowledge experience and innovative ideas Together we will explore the fascinating world of AI applied to education analyze its current impact and anticipate ways of integrating it judiciously and ethically into our educational practices We are convinced that this meeting represents a fundamental step towards catalyzing constructive dialogue stimulating innovation and forging an educational future where technology serves the development and education of everyone

Biometrics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2016-08-30 Security and authentication issues are surging to

the forefront of the research realm in global society As technology continues to evolve individuals are finding it easier to infiltrate various forums and facilities where they can illegally obtain information and access By implementing biometric authentications to these forums users are able to prevent attacks on their privacy and security **Biometrics Concepts Methodologies Tools and Applications** is a multi volume publication highlighting critical topics related to access control user identification and surveillance technologies Featuring emergent research on the issues and challenges in security and privacy various forms of user authentication biometric applications to image processing and computer vision and security applications within the field this publication is an ideal reference source for researchers engineers technology developers students and security specialists

Web Services: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-12-07 Web service technologies are redefining the way that large and small companies are doing business and exchanging information Due to the critical need for furthering automation engagement and efficiency systems and workflows are becoming increasingly more web based **Web Services Concepts Methodologies Tools and Applications** is an innovative reference source that examines relevant theoretical frameworks current practice guidelines industry standards and standardization and the latest empirical research findings in web services Highlighting a range of topics such as cloud computing quality of service and semantic web this multi volume book is designed for computer engineers IT specialists software designers professionals researchers and upper level students interested in web services architecture frameworks and security

Smart Systems: Innovations in Computing Arun K. Somani, Ankit Mundra, Rohit Kumar Gupta, Subhajit Bhattacharya, Arka Prokash Mazumdar, 2024-09-29 The book features original papers from the 4th International Conference on Smart IoT Systems Innovations in Computing SSIC 2023 organized by Manipal University Jaipur India during 26-27 October 2023 It discusses scientific works related to data engineering in context of computational collective intelligence consisted of interaction between smart devices for smart environments and interactions Thanks to the high quality content and the broad range of the topics covered the book appeals to researchers pursuing advanced studies

Artificial Intelligence Learning Facilitators Fadi Al-Turjman, 2025-10-28 **Artificial Intelligence Learning Facilitators Creating Smart Education Systems** delves into the various AI based techniques such as machine learning and natural language processing that can help in automating management tasks such as lecture preparation students performance evaluation and predictive performance assessment It highlights the importance of AI in handling the increasing learning complexities The book explores the use of AI based virtual assistants and chatbots in enhancing teaching services for students and instructors It also discusses the potential of AI in creating personalized and targeted learning experiences The centerpiece of the book is a presentation of the learning and teaching system AI Prof DUX The use cases cover such scenarios as Question generation for quizzes and exams The development and implementation of lecture scheduling The lecture notes generator Examination platform Lecture video link generation Classroom chat platform Courses management

The book is an exploration of the crucial role of AI as a game changer in educational transformation. It emphasizes how AI can positively impact various aspects of smart education systems.

Computational Vision and Bio-Inspired Computing

S. Smys, João Manuel R. S. Tavares, Fuqian Shi, 2023-04-07 This book includes selected papers from the 6th International Conference on Computational Vision and Bio Inspired Computing ICCVBIC 2022 held in Coimbatore India from November 18 to 19 2022. This volume presents state of the art research innovations in computational vision and bio inspired techniques. It includes theoretical and practical aspects of bio inspired computing techniques like machine learning sensor based models evolutionary optimization and big data modeling and management that make use of effectual computing processes in the bio inspired systems.

Smart Payroll: Harnessing AI and ML for Efficient Payroll Systems Dr. RVS Praveen, Satya Subrahmanya Sai Ram Gopal Peri, 2025-04-17 *Smart Payroll: Harnessing AI and ML for Efficient Payroll Systems* explores the intersection of intelligent technologies and payroll management in modern enterprises. This comprehensive guide delves into how Artificial Intelligence and Machine Learning are streamlining payroll functions from salary predictions and automated tax compliance to chatbot driven employee support and predictive analytics.
