Garcia, Victor E. Camp, Anita Grunder, 2018-10-11 Don Swanson who received the GSA Mineralogy Geochemistry Petrology and Volcanology Division's Distinguished Geologic Career award in 2016 has adopted a detailed field oriented approach to studying problems of great volcanologic importance across a range of compositions and spatio temporal scales Swanson's work has resulted in a series of fundamental contributions that have advanced understanding of the Columbia River flood basalts Cascade volcanic arc and Hawai'i and his insights have been applied not only around the world but across the solar system This volume emphasizes the role of field volcanology as a window into better understanding volcanic processes past and present and highlights in particular those places and processes where Swanson's insights have been particularly impactful *The Prepper Next Door* Charlie Palmer, 2012 A book for practical preppers those planning for emergencies or disasters Discusses food storage water purification and collection sanitation first aid bug out bags bug out vehicles home and self defense firearms and shooting providing lights and utilities and aspects of home construction AUTHOR BIO Charlie Palmer became a prepper back in the early 1980s when he first read The Survivor newsletter Today he recommends people make modest preparations for natural disasters and other emergencies His interests include do it yourself repairs shooting welding machining and outdoor survival **Human/Animal Relationships in Transformation** Augusto Vitale, Simone Pollo, 2022-02-11 The ethics of human animal relationships is a growing field of academic research and a topic for public discussion and regulatory interventions from law makers governments and private institutions Human animal relationships are in transformation and understanding the nature of this process is crucial for all those who believe that the enlargement of moral and legal recognition to nonhuman animals is part of contemporary moral and political progress Understanding the nature of this process means analysing and critically discussing the philosophical scientific and legal concepts and arguments embedded in it This book contributes to the discussion by bringing together the ideas and reflections of leading experts from different disciplinary backgrounds and with a range of scientific perspectives This book both provides an up to date examination of the transformation of human animal relationships and presents ideas to foster this process Establishing the Environmental Flow Regime for the Middle Zambezi River Elenestina Mwelwa-Mutekenya, 2021-07-28 The Middle Zambezi host to a rich biodiversity is located in the central part of the Zambezi River Basin which covers eight Southern African Countries The area is located downstream of three hydropower schemes In the last decades the floodplain riparian tree the *Faidherbia albida* vital for the local wild life has shown a worrying decrease in its regeneration rates This thesis explores establishing the environmental flow regime for the Middle Zambezi reach in order to minimise the impact of the upstream hydropower schemes on the river environment using the *Faidherbia albida* tree as a biological indicator The research identified that the current dam operations have completely altered the natural hydrological rhythm from pre Kariba dam dry season flows of 100 200 m³ s increasing to 1 000 1 500 m³ s The sudden closure of the dam floodgates can be linked to the observed river channel widening phenomenon In addition the *Faidherbia albida* tree now experiences longer flood

residence over the floodplain making it inaccessible to animals to allow for regeneration In order to save the F albida tree a two pronged environmental flow regime is proposed of releasing a moderate flood of 5 800 m³ s once in 5 years for 5 to 6 weeks in the months of February to March and phasing the spillway gates closure over a period of 3 to 4 weeks to keep the floodplain wet enough until the months of May and June Phasing of the spillway gate closure would also mitigate the excessive bank erosion
