Our Enemies in Blue Kristian Williams, 2015-08-17 Let's begin with the basics violence is an inherent part of policing The police represent the most direct means by which the state imposes its will on the citizenry They are armed trained and authorized to use force Like the possibility of arrest the threat of violence is implicit in every police encounter Violence as well as the law is what they represent Using media reports alone the Cato Institute's last annual study listed nearly seven thousand victims of police misconduct in the United States But such stories of police brutality only scratch the surface of a national epidemic Every year tens of thousands are framed blackmailed beaten sexually assaulted or killed by cops Hundreds of millions of dollars are spent on civil judgments and

settlements annually Individual lives families and communities are destroyed In this extensively revised and updated edition of his seminal study of policing in the United States Kristian Williams shows that police brutality isn't an anomaly but is built into the very meaning of law enforcement in the United States From antebellum slave patrols to today's unarmed youth being gunned down in the streets peace keepers have always used force to shape behavior repress dissent and defend the powerful Our Enemies in Blue is a well researched page turner that both makes historical sense of this legalized social pathology and maps out possible alternatives Kristian Williams is the author of several books including American Methods Torture and the Logic of Domination He co edited Life During Wartime Resisting Counterinsurgency and lives in Portland Oregon **A**

Imposing Duties Malcolm K. Sparrow,1994-02-07 Policing environmental protection and tax administration have much more in common than practitioners in these areas often recognize Their cultures and traditions have for the past few decades incorporated a classic enforcement mentality based on the underlying assumption that a ruthless and efficient investigative and enforcement capability would produce compliance through the mechanisms of deterrence In these fields and perhaps in many other enforcement or compliance oriented professions Sparrow believes the traditional enforcement approach is under stress There are too many violators too many laws to be enforced and not enough resources to get the job done In this book Sparrow draws out remarkable parallels in the ways these professions are adapting to meet their current challenges as they reject their traditional reliance on retrospective case by case after the fact enforcement Rather than perpetuating their dependence on processes procedures and coverage these professions are each developing new capacities for analyzing important patterns of noncompliance prioritizing risks and designing intelligent interventions using a much broader range of tools Sparrow extracts the essence of the transformations underway explores the critical implications for information management and lays out the issues that need resolution before the emerging compliance strategies can reach maturity This book is required reading for all those concerned with either the theory or the practice of the compliance side of government

Improving Police Response to Persons with Mental Illness Thomas Joseph Jurkanin, Larry T. Hoover, Vladimir Sergevnin, 2007 The Ghostbusters refrain Who you gonna call typically connotes a lighthearted response to an unusual problem but in the context of a human being suffering a mental health crisis the refrain is anything but lighthearted In an ideal world who you gonna call would be a trained mental health professional In the real world the cry for help is usually received by the police Police respond because there is no one else to assist Police officers rank mental health crisis situations as far more stressful than crimes in progress A person suffering from mental illness is by definition not fully rational Although they are likewise not fully irrational behavior is unpredictable and unpredictable behavior for the police is potentially dangerous behavior As a consequence outcomes of engagement between law enforcement and mental health consumers are too often tragic No organization is more concerned about inadequate response than the police themselves Improving Police Response to Mental Illness provides best practices guidance A national pool of experts provide both insight and recommendations ranging from the conceptual Atypical Situations Atypical Responses to the pragmatic Law Enforcement Training Models Written specifically for the book each chapter addresses a given critical component including social policy police response alternatives training legal constraints and cooperative agreements with mental health service providers This is an indispensable volume on the subject of police and mental health and is designed for police practitioners mental health professionals and scholars of social policy
