Thompson, Megan Burton, Annalisa Cusi, David Wright, 2018-03-01 This book consists of 13 papers developed by participants in the ICME 13 Topic Study Group 40 on Classroom Assessment The individual papers discuss various aspects of classroom assessment focusing particularly on formative assessment as assessment for learning and are grouped into four main sections Examples of Classroom Assessment in Action Technology as a Tool for Classroom Assessment Statistical Models for Formative Assessment and Engaging Teachers in Formative Assessment The book opens with a brief discussion of the use of formative assessment as a critical component of the teaching learning process and concludes with an overview of lessons learned and ideas for future research It is of interest to classroom teachers university teacher educators professional development providers and school supervisors The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation Bruce B. Frey, 2018-01-29 This encyclopedia is the first major reference guide for students new to the field covering traditional areas while pointing the way to future developments International Perspectives on Teaching and Learning Mathematics with Virtual Manipulatives Patricia S. Moyer-Packenham, 2016-06-21 This book explores terminology frameworks and research being conducted worldwide on virtual manipulatives It brings together international authors who provide their perspectives on virtual manipulatives in research and teaching By defining terminology explaining conceptual and theoretical frameworks and reporting research the authors provide a comprehensive foundation on the study and use of virtual

manipulatives for mathematics teaching and learning This foundation provides a common way for researchers to communicate about virtual manipulatives and build on the major works that have been conducted on this topic By discussing these big ideas the book advances knowledge for future research on virtual manipulatives as these dynamic tools move from computer platforms to hand held touch screen and augmented platforms Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
