**Geometry** S. Lang,G. Murrow,2013-03-14 A geometry course based on this book was taught success fully by Gene Murrow for several years We are much indebted to Springer Verlag for publishing Geometry so that others can try our approach The publishers and we thought it would be appropriate to issue the book first in a preliml nary edition on which we would welcome comments especially from students and teachers of the high school geometry course Such comments can bear on any aspect of Geometry ranging from the choice of topics the ordering of the topics and other global considerations to possible computational errors and misprints We shall welcome criticisms and suggestions Serge Lang Gene Murrow

Geometry with Applications and Proofs Aad Goddijn,Martin Kindt,Wolfgang Reuter,2014-12-03 This book shows how geometry can be learned by starting with real world problems which are solved by intuition common sense reasoning and experiments Gradually the more formal demands of mathematical proofs get their proper place and make it possible to explore new applications This process helps students to feel the need for precise definitions and procedures to contribute to the construction of an axiomatic system and to experience the power of systematic reasoning The course is designed for students in a Nature Technology strand which prepares for studying the sciences or technology at university level Its goal was basically to reintroduce proof in a meaningful way in the late 1990s Dutch secondary education curriculum Following the educational view of the Freudenthal Institute this is not done by stating Euclid s axioms on page one but rather a starting point is chosen in students intuitions and tentative solutions of problems that are experienced as real and relevant The photograph on the cover shows students exploring one of the problems from the midpart of the course in the computerlab
