LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: size, color, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. She asked us to write a paper on the lizards we selected and to present our findings to the class.

An adaptation is a structure or function that the organism has as a response to its environment. This ability to survive and reproduce is a particular adaptation. Provide one example and an explanation of an adaptation of the lizard you chose.

The adaptation of the lizard I chose is its ability to change color. This is an adaptation because it allows the lizard to blend in with its environment and avoid predators.

Provide one evolutionary explanation for why the ability to change color is an adaptation (i.e., this group) would have survived & thrived.

The ability to change color is an adaptation because it allows the lizard to blend in with its environment and avoid predators.
