accessible and skilful account of South Africa's socio-economic challenges policy and governance choices THEMBA MASEKO All the numbers on South Africa's crisis dashboard are blinking red The economy is failing to grow and more and more young people find themselves on the outside looking in as education falters and jobs disappear Energy and transport are in crisis Governance is floundering as debt mounts and government runs out of money Better Choices is a collection by South Africa's top thinkers on the political economy providing an unflinching account of the myriad challenges the country faces The picture that emerges is of a nation on the brink of a catastrophic slide into failure unless better if tough policy choices are made As stark as these problems are their solutions are tantalisingly close at hand The chapters in this book outline exactly the solutions those better choices that need to be made by leadership to alter the country's bleak trajectory South Africa cannot talk its way out of trouble Key to success is removing the sources of friction the red tape over regulation and rents that slow down investment This is only possible if a more effective focused government acts decisively Compiled by The Brenthurst Foundation Africa's leading think tank on economic development Better Choices is for those who want to build a positive inclusive future for South Africa *The Skills Balancing Act in Sub-Saharan Africa* Omar Arias, David K. Evans, Indhira Santos, 2019-01-31 Despite strong recent economic growth Sub-Saharan Africa has levels of economic transformation poverty reduction and skill development far below those of other regions Smart investments in developing skills aligned with the policy goals of productivity growth inclusion and adaptability can help to accelerate the region's economic transformation in the 21st century Sub-Saharan Africa's growing working age population presents a major opportunity to increase shared prosperity Countries in the region have invested heavily in building skills public expenditure on education increased sevenfold over the past 30 years and more children are in school today than ever before Yet systems for building skills in this population have fallen short and these shortcomings significantly impede economic prospects In half of the countries fewer than two in every three children complete primary school even fewer reach and complete higher levels of education Learning outcomes have been persistently poor leading to substantial gaps in basic cognitive skills literacy and numeracy among children young people and adults The literacy rate of the adult population is below 50 percent in many countries functional literacy and numeracy rates are even lower Systemwide change is required to achieve significant progress Multiple agencies at the central and local levels are involved in skills development strategies making skills everyone's problem but no one's responsibility Policies and reforms need to build capacity for evidence-based policies and create incentives to align the behaviors of all stakeholders with the pursuit of national skills development goals *The Skills Balancing Act in Sub-Saharan Africa Investing in Skills for Productivity Inclusivity and Adaptability* lays out evidence to inform the policy choices that countries will make in skill investments Each chapter addresses a set of specific questions drawing on original analysis and synthesis of existing studies to explore key areas How the skills appropriate to each stage of the life cycle are acquired and what market and institutional failures affect skills formation What systems are needed for individuals

to access these skills including family investments private sector institutions schools and other public programs How those systems can be strengthened How the most vulnerable individuals those who fall outside the standard systems and have missed critical building blocks in skills acquisition can be supported Countries will face trade offs often stark ones that will have distributional impacts and a bearing on their development path Committed leaders reform coalitions and well coordinated policies are essential for taking on the skills balancing act in Sub Saharan Africa **Annual Report**
