Leahs Long Lens English Edition:

The Lost Matriarch Jerry Rabow, 2014-09-01 The Lost Matriarch offers a unique response to the sparse and puzzling biblical treatment of the matriarch Leah Although Leah is a major figure in the book of Genesis the biblical text allows her only a single word of physical description and two lines of direct dialogue The Bible tells us little about the effects of her lifelong struggles in an apparently loveless marriage to Jacob the husband she shares with three other wives including her beautiful younger sister Rachel Fortunately two thousand years of traditional and modern commentators have produced many fascinating interpretations midrash that reveal the far richer story of Leah hidden within the text Through Jerry Rabow's weaving of biblical text and midrash readers learn the lessons of the remarkable Leah who triumphed over adversity and hardship by living a life of moral heroism The Lost Matriarch reveals Leah's full story and invites readers into the delightful provocative world of creative rabbinic and literary commentary By experiencing these midrashic insights and techniques for reading between the lines readers are introduced to what for many will be an exciting new method of personal Bible interpretation **Leah's Special** , Fertility Counseling: Case Studies Sharon N. Covington, 2022-12-08 An updated and comprehensive book of case studies exploring the unique challenges of reproductive patient care in fertility counselling

Hollywood Shelley Stamp, 2015-05-01 Among early Hollywood's most renowned filmmakers Lois Weber was considered one of the era's three great minds alongside D.W. Griffith and Cecil B. DeMille. Despite her accomplishments, Weber has been marginalized in relation to her contemporaries who have long been recognized as fathers of American cinema. Drawing on a range of materials untapped by previous historians, Shelley Stamp offers the first comprehensive study of Weber's remarkable career as director, screenwriter, and actress. *Lois Weber in Early Hollywood* provides compelling evidence of the extraordinary role that women played in shaping American movie culture. Weber made films on capital punishment, contraception, poverty, and addiction, establishing cinema's power to engage topical issues for popular audiences. Her work grappled with the profound changes in women's lives that unsettled Americans at the beginning of the twentieth century, and her later films include sharp critiques of heterosexual marriage and consumer capitalism. Mentor to many women in the industry, Weber demanded a place at the table in early professional guilds, decrying the limited roles available for women on screen, and in the 1920s protesting the growing climate of hostility toward female directors. Stamp demonstrates how female filmmakers who had played a part in early Hollywood's bid for respectability were in the end written out of that industry's history. *Lois Weber in Early Hollywood* is an essential addition to histories of silent cinema, early filmmaking in Los Angeles, and women's contributions to American culture. **A readable English dictionary, etymologically arranged** David Milne (M.A.), 1888

Visioning Technologies Graham Cairns, 2016-12-08 *Visioning Technologies* brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight. Understood to include orthographic projection, perspective drawing, telescopic devices, photography, film, and computer visualization amongst others, each chapter deals with its own area and historical period of expertise, organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today. This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically, and suggests this continues today. Paradoxically, it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world.
