Authentic Professional Learning Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or paraprofessional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self-regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents *Jackpot!* Nicole Dimich, Cassandra Erkens, Tom Schimmer, 2022-08-09 An age-old question universal to all teachers is How do we get our students to care about their learning Jackpot delivers actionable strategies to achieve that most important outcome of assessment student investment Not only does the book offer tools you can use but it also addresses the mindset shift necessary for teachers to set students up for success as partners in their own learning Classroom teachers will Explore case studies covering a wide range of classroom experiences Gain access to many different tools to successfully orient a growth mindset toward assessment Understand the ideas behind successful assessment and how to put it into practice Utilize sample charts to better direct the course of learning improvements Reflect on personal classroom experiences and ways to improve Contents Acknowledgments Table of Contents About the Authors Introduction Chapter 1 Hope Efficacy and Achievement in a Learning Culture Chapter 2 Assessment Purpose Chapter 3 Assessment Architecture Chapter 4 Interpretation of Results Chapter 5 Communication Chapter 6 Instructional Agility Epilogue References and Resources Index **Building Blocks for Social-Emotional Learning** Tracy A.
