*Photogrammetry for Archaeological Objects* Madeline G.P. Robinson, 2024-08-01

Photogrammetry is the process of obtaining digital three dimensional models of objects, features, or landscapes from a series of overlapping focused and well exposed two dimensional photographs. Photogrammetry is becoming standard practice for archaeological analysis especially since a digital camera now features consistently in an archaeologist's tool kit. An archaeological career however does not traditionally involve becoming an expert in photography. Photogrammetry for Archaeological Objects A Manual explains in simple, easy to follow steps all the essential elements of photography, how to design a controlled photography setup, how to shoot in an uncontrolled environment and how to edit your images so you can develop your proficiency in photography and by extension photogrammetry. This guide will provide you with a comprehensive introduction to the process of setting up your camera for photogrammetry, shooting the necessary camera positions required to completely capture your artefacts and how to use these images captured to process and edit your photogrammetry models. With the aid of 11 different case studies of a variety of archaeological objects you can develop your understanding of how to approach different archaeological material for modelling purposes what camera gear and shooting environment is the most

suitable and what camera angles are suitable to correctly capture your object Photogrammetry for Archaeological Objects is your go to guide for building successful and usable 3D photogrammetry models of archaeological material that can be used for analysis conservation and educational purposes    **Digital Photography For Dummies** Julie Adair King,2016-06-13
