Computerized Software Techniques of Data Management and Analysis in Educational Research Valentine Joseph
 Owan,Bassey Asuquo Bassey,2018 The study was conducted to compare manual and computerized software techniques of
 data management and analysis in educational research Specifically the study investigated whether there was a significant
 difference in the results of Pearson correlation independent t test and ANOVA obtained from using manual and computerized
 software technique of data analyses Three null hypotheses were formulated accordingly to guide the study The study adopted
 a quasi experimental research design where several data were generated by the researchers and analyzed using manual and
 computerized software techniques The data were generated to suit the required data of each statistical method of analysis
 CASIO fx 991ES PLUS NATURAL DISPLAY scientific calculator and statistical tables were used for manual analysis while
 data analysis tool pack of Microsoft Excel version 2013 were used for computerized software analysis The results of the
 analysis revealed that both manual and computerized software techniques yielded the same results for Pearson correlation
 independent t test and ANOVA It was concluded that though both manual and computerized techniques are reliable and
 dependable computerized technique is faster and efficient in managing and analyzing data than manual technique It was
 recommended among other things that any of the techniques should be used without fear when computing Pearson
 independent t test and one way ANOVA as it is the same results that will be gotten
