

FOUR IMPORTANT INSIGHTS ABOUT MEDIA MESSAGES

1

All media messages are constructed. Media are made by people who make choices about content, techniques, and how messages are shared. The perspectives, values, and culture of media makers are embedded in the media they create, sometimes purposefully and sometimes unconsciously.

Implications for Teaching: We prompt students to look for **WHAT** the substance, source, and significance of a bias might be rather than instructing them to ask **IF** there is a bias in a particular message (since all media messages include biases).

2

People use their individual skills, beliefs, and experiences to construct their own meanings of media messages. People can (and often do) interpret the same message differently without anyone being wrong.

Implications for Teaching: We focus on the quality or validity of evidence and reasoning rather than expecting all students to arrive at a particular conclusion.

3

Media and media messages can influence beliefs, attitudes, values, behaviors, and the democratic process. Understanding what the impact might be, and on whom, is at the core of media literacy.

Implications for Teaching: We need to model for students the importance of taking both print and nonprint sources seriously and assign both. We also need to help students examine which messages media repeat most often and why and offer counter-narratives by routinely integrating into instruction media from diverse sources and points of view.

4

Different forms of media have different characteristics, strengths, and a unique “language” of construction. For example, traditional essay writing involves vocabulary like “paragraphs,” “topic sentences,” and “sub-titles,” whereas writing a blog involves all of those and also vocabulary such as “wallpaper/theme,” “widgets,” “plug-ins,” “tags,” “hyper-links,” “comment protocols,” and the like.

Implications for Teaching: Students can’t analyze what they don’t notice, and they rarely notice things for which they have no language. To provide common ground for discussions and production, introduce medium-specific communication techniques and teach students to use medium-specific vocabulary when they analyze and create.
