

A top-down view of a person's hands working on a desk. One hand is writing on a document with a black pen. The desk is covered with various items: a laptop on the left, a tablet with a blue screen, and several sheets of paper featuring colorful charts and graphs. A magnifying glass is placed on one of the papers. The background is a light-colored wooden desk.

to reduce infection rates These initiatives have led to savings on treatment of between 141 million and 263 million as well as reducing discomfort disability and for some death that might have been caused by these avoidable infections There has also been a perceptible change in trust leadership on tackling infections The impact has not however been the same in all trusts or for other infections Following the Department s intervention to improve recording on death certificates where MRSA or C difficile was the underlying cause or a contributory factor in 2007 around 9 000 people were reported as having died in such circumstances There is still no national information on deaths from other healthcare associated infections such as urinary tract infections and pneumonia and blood stream infections due to other causes may be increasing
