EMT-Paramedic Flashcard Book Jeffrey Lindsey, 2013-01-01 REA's Interactive Flashcard books represent a novel approach that combines the merits of flash cards with the ease of using a book. One side of each page includes questions to be answered with space for writing in one's answers, a feature not usually found on flash cards. The flip side of the same page contains the correct answers much as flash cards do. The EMT PARAMEDIC EXAM Interactive Flashcard book is fully indexed making it easy to locate topics for study. Thanks to the book form there is no need to look for and fish out appropriate questions from a box and put them back in the proper order and there is no need to carry around a box of 1 000 or so flash cards. The book is easier to take along and carry. *Learning Interventions and Training: Providing Support during Health Emergencies* Jamie Sewan Johnston, Bruce Struminger, Qiang Zhang, Jane Noyes, Matthew Strehlow, Heini Utunen, 2025-05-15 Learning interventions and training methods are pivotal in preparing healthcare workers and the public to effectively respond to health emergencies. Translational Medicine in the Diagnosis and Treatment of Cancer based on Oncogenetics: From Bench to Bedside Changjing Cai, Rui Cao, Jiao Hu, Ying Han, Changsheng Xing, 2023-12-07 Translational medicine was first mentioned in 1992 by Choi D W and has since become a rapidly expanding area within biomedical research. It is based on the bench to bedside approach which describes its relationship between basic science and clinical practice. In 2008 Drs Conway and Dougherty provided a 3 step process to translational medicine and how it should be implemented to transform healthcare systems. The first step is the translation of basic science into clinical research T1. The second step T2 focuses on making healthcare more patient specific basing itself on providing the right treatment for the right patient in the right way at the right time. T2 also looks for this science to be translated into practice guidelines for clinicians, policy makers and the patients.

themselves The final step T3 addresses the how of implementing these ideas so that high quality healthcare can be delivered reliably to all patients in all settings of care T3 activities would include policy changes that could serve to bring about meaningful change towards this goal Cancer is a major public health problem worldwide Clarifying the etiology and pathogenesis of cancer is of great significance to the prevention diagnosis and treatment of the disease The bench to bedside pattern can be a useful method for cancer related studies This Research Topic aims to highlight the emerging role of oncogenetics in cancer and discuss potential challenges of diagnosis and treatment from the bench to the bedside
