Making Math Stick David Costello, 2021-04-09 This remarkable book shows teachers how to stop working harder and start working smarter It describes a shift from teach test move on to teach connect apply to optimize student learning This valuable resource provides teachers with an understanding of simple manageable and sustainable strategies to change their approach immediately These strategies build on helping students retain math concepts so they can apply them in novel situations down the road The focus is on supporting teachers in framing instruction so that students strengthen their understanding and can remember and apply learning Making Math Stick is a game changer that champions durable learning for all students *A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum* Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of

Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cpmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century

How to Use Value-Added Analysis to Improve Student Learning Kate Kennedy, Mary Peters, Mike Thomas, 2011-11-30 A step by step guide to transforming student learning with value added analysis Value added analysis is the most robust statistically significant method available for helping educators quantify student progress over time This powerful tool also reveals tangible strategies for improving instruction Built around the work of Battelle for Kids this book provides a field tested continuous improvement model for using value added information to increase student learning The five step process shows how to Create the conditions for success Examine district school and classroom reports to assess strengths and challenges Use these reports to create an improvement plan Implement instructional changes Evaluate and adjust the changes as the new school year starts Each chapter includes case studies real life examples action steps and reflective questions in addition to numerous tools samples and protocols for implementing the model By focusing on specific professional practices associated with gains in student performance conversations shift from blame to analysis from defensiveness to professional learning and from micromanagement to inquiry a fresh perspective that results in student success

Achieving Success for New and Aspiring Superintendents Mary Frances Callan, William Levinson, 2011 The authors of this book wrote it for those aspiring to be superintendents those new to the position and those completing their second or third year and who are looking to the future What makes their approach unique is the belief that talented people who aspire to be superintendents are far more likely to accomplish that goal and achieve success on the job if they understand the totality of the position School districts are complex organizations Providing effective leadership to these organizations requires mastery of a wide array of

leadership and organizational skills Aspiring superintendents with vision and motivation who understand the inherent challenges of the position have a great advantage over those who do not The book s goal is to provide readers with this advantage This is why the book covers the full cycle of the first superintendent position preparation application and transition the challenges of the first few years and the decision to stay or move to another position Aspiring and new superintendents who read the book will learn about the full range of skills and knowledge needed to succeed They will be better prepared to be effective superintendents *Register* University of Tennessee (Knoxville campus),1891 **OECD**
