

MR roadmap: Co-registration of MRI scan with 3D angio data

2D Perfusion high-definition visualizations

Confident navigation and device placement

Live Image Guidance is an essential tool for efficient navigation and device placement. Our Roadmap Pro, 3D Roadmap, and MR/CT Roadmap options offer state-of-the-art guidance in 2D and 3D that can save time during procedures. Different clinical modes provide application-specific settings to enhance visualization of challenging devices or materials like ONYX. These tools are equipped with the AlluraClarity's unique automatic motion compensation to keep the Roadmap and live image in sync with each other without any user intervention or changes in the regular workflow.

Avoid time-consuming manual pixel shift for archiving

By shifting and rotating pixels on the sub-pixel level automatically during every procedure, AlluraClarity's Automatic Motion Compensation enhances results compared to manual pixel shift. It eliminates the need for manual pixel shift post-processing.

Quick post-check in the interventional lab

To save time and unnecessary patient handling, you can use our XperCT scan to do a post procedural check for bleedings while the patient is still on the table. Its enhanced grey scale visualization and more homogeneous images enhance the visualization of soft tissue and small bleedings.

Precision agriculture '25 John V. Stafford, 2025-07-08 These edited proceedings contain 181 peer reviewed papers presented at the 15th European Conference on Precision Agriculture organized by Universitat Politècnica de Catalunya June 29-3 July 2025 in Barcelona Spain The papers reflect the wide range of disciplines that impinge on precision agriculture technology crop science soil science agronomy information technology decision support remote sensing data analysis and others Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment market forces quality requirements traceability vehicle guidance and crop management Sensors now in use in agriculture are generating Big Data leading to the use of machine learning and AI an increasing challenge for agriculture Research continues to be necessary and needs to be reported and disseminated to a wide audience The broad range of research topics reported will be a valuable resource for researchers advisors teachers and professionals in agriculture long after the conference has finished

Manual of Thoracic Endoaortic Surgery Jacques Kpodonu, 2010-08-18 In today's healthcare environment the real driver is value Maximizing outcomes and minimizing costs or providing similar outcomes with lower cost in terms of actual numbers or recovery time will dominate our healthcare delivery system An excellent example of this evolution is in the field of cardiovascular intervention Dr Jacques Kpodonu's Manual of Thoracic Endo Aortic Surgery is a most timely and descriptive work in this burgeoning field It provides an excellent overview of current technology and techniques plus the endovascular expert can drill down into the details of the devices and technologies described and significantly enhance their knowledge and perspective Procedural detail excellent graphics pertinent imaging studies and relevant instruction are the mainstays of this text The first chapter comprises the key overview and very comprehensively covers the platform the hybrid OR the tools the accessories and the medium superb state of the art imaging modalities required to perform these advanced procedures The text then moves into more technical details including options and instruction regarding access approaches and potential pitfalls of such This is followed in ensuing chapters by dissemination of precise information techniques and indications for the most popular and utilized grafts including Boston Relay Stent Graft Cook TX2 Zenith Stent Grafts as well as the Gore and Medtronic Aortic Stent Grafts **AF Manual** United States.

Department of the Air Force, 1979 **Use and Misuse of New Technologies** Elena Carpanelli, Nicole Lazzarini, 2019-05-14 The ever increasing use of technology is challenging the current status of the law bringing about new problems and questions The book addresses this trend from the perspective of International law and European Union law and is divided into three main thematic sections The first section focuses on the legal implications of the use of technology either for law enforcement purposes or in the context of military activities and examines how this use adds a new dimension to perennial issues such as the uneasy balance between security concerns and the protection of individual rights and defining the exact scope of certain State obligations In so doing it takes into account a range of current and potential scenarios at the

international regional and domestic level including the use of killer robots databases drones and technology in general to patrol borders exchange information on criminal suspects maintain public order target suspected terrorists and conduct military activities In turn the second section examines the role of institutional and non institutional actors in establishing substantive normative standards for the use of high tech applications In this respect it focuses both on the role that European courts have played so far and on how other actors initiatives can contribute to the construction of a new legal framework for technology related activities Lastly the third section has a two fold focus the first part investigates how the increasing reliance on technology is affecting traditional rules on international responsibility and is challenging in particular the attribution of wrongful conduct to States and international organizations The second part addresses issues of jurisdiction and justiciability Given the scope of its coverage this timely book addresses an important lacuna in the current legal scholarship exploring some of the most recent applications of technology and the legal issues arising as a result Readers will gain novel insights into the challenges posed to International law and European law by the growing reliance on technology taking into account both its uses and misuses Manual of Standard and Recommended Practices Association of American Railroads.
