Personnel Literature, 1979 **The Dragon from the Mountains** Matthew McCartney, 2022-02-03 China has promised to invest more than 60 billion in Pakistan in roads rail energy and a deep water port at Gwadar This is unprecedented relative to decades of minimal foreign direct investment FDI entering Pakistan This is the China Pakistan Economic Corridor CPEC Support for CPEC in Pakistan is widespread and encompasses much of academia the military the mainstream political leadership and civil society Supporters argue that CPEC offers the potential to transform Pakistan and support rapid equitable and sustainable economic growth Detractors of CPEC argue that it will more likely tip Pakistan into a dependent debt relationship with China and that it will facilitate more Chinese imports into Pakistan posing a threat to Pakistan's industrial base This book utilises an in depth understanding of economic change in contemporary China and Pakistan and economic theory and studies of big infrastructure projects from the contemporary and historical world to evaluate these contrasting views about CPEC Congressional Record United States. National Convention of the American Legion** American Legion. Annual National Convention, 2014 Appropriation Act 2013 Amendment Bill: Justice-CRF, 2013 *Queer Career* Margot Canaday, 2025-05-27 Historians have noted that gay identity is central to the history of capitalism but because of an assumption that workplaces were straight spaces in which queer people passed historians of sexuality have had almost nothing to say about work instead directing their attention to the street and to the bar This book presents employment and the accompanying fear of job loss as one of the most salient features of queer life for most of the twentieth century and looks at the political and legal developments of gay labor in the workplace alongside the histories of women's minorities and immigrants labor Starting midcentury with the Lavender Scare the federal government's massive purge of gay people from the Civil Service the book traces how workplaces opened to gay workers albeit unevenly over the second half of the twentieth century Drawing on a number of archival sources and interviews this is a history of the workplace that shows larger

structural change while also giving voice to many underrepresented individuals Throughout Margot Canaday emphasizes the concept of precariousness a commonly deployed category within labor studies to designate that expanding category of workers in industrial societies who are detached from permanent standardized secure and protected employment While women and racial minorities also share this longer history of precarious work the LGBT experience was a particularly powerful precedent for the changing character of economic life at the end of the 20th century Despite that the book shows that workplaces were surprisingly responsive to demands from gay employees for protection and benefits Canaday shows that business was out ahead of both the government and labor unions in offering antidiscrimination protection and domestic partner benefits to gay workers The final part of the book traces how gay rights came to be the most marketized privatized civil rights social movement and how we should consider the gay experience in the workplace not as marginal or atypical but as central and predictive for all workers

Building the Compensatory State Robert F. Durant, 2019-09-24 Contemporary public administration research has marginalized the importance of taking history seriously With few exceptions little recent scholarship in the field has looked longitudinally rather than cross sectionally contextually and theoretically over extended time periods at big questions in public administration One such big question involves the evolution of American administrative reform and its link since the nation s founding to American state building This book addresses this gap by analyzing administrative reform in unprecedented empirical and theoretical ways In taking a multidisciplinary approach it incorporates recent developments in cognate research fields in the humanities and social sciences that have been mostly ignored in public administration It thus challenges existing notions of the nature scope and power of the American state and with these important aspects of today s conventional wisdom in public administration Author Robert F Durant explores the administrative state in a new light as part of a compensatory state driven shaped and amplified since the nation s founding by a corporate social science nexus of interests Arguing that this nexus of interests has contributed to citizen estrangement in the United States he offers a broad empirical and theoretical understanding of the political economy of administrative reform its role in state building and its often paradoxical results Offering a reconsideration of conventional wisdom in public administration this book is required reading for all students scholars or practitioners of public administration public policy and politics
