The area has been dominated by large and complex introductory texts, often from the US, which many lecturers find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct, modular, UK focused introduction to the subject of financial management. Quality controlled by an academic review panel, the content and approach has been rigorously developed to answer the needs of non finance students. The user friendly features and design will be of great appeal to the many undergraduates who find finance a difficult subject. Examples, models, formulas, and exercises are lucidly and clearly presented, supported by strong pedagogical features: learning objectives, worked examples, key learning points, further reading, practical assignments, references, case studies, and teacher's guide. This ensures that *Financial Management* will prove the most accessible text for business and finance students.
