Information in the Marketplace for Financial Services Paul Latimer, Philipp Maume, 2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how

the efficient operation of financial markets is dependent on disclosure It examines the adequacy of common law and civil law concerning broker client disclosure and concludes that industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the 1930s described it as a shotgun behind the door *An Introduction to Accountancy, 12th Edition* Maheshwari S.N. & Maheshwari S.K. & Maheshwari Sharad K., This well known textbook provides students with the knowledge of basic accounting principles and practices in a systematic manner The unique feature that has made this book popular among students is the simplicity of presentation which enables them to understand the subject and solve practical problems with ease The main strengths of the book are updated text plentiful illustrative examples and the end of chapter exercises with answers The wide coverage and user friendly approach help the book to meet the course content requirements for BCom BBA MCom MCA examinations of different universities and examinations conducted by professional institutions KEY FEATURES Updated text in view of new and withdrawn accounting standards and their interpretation Formulation of the roadmap for convergence of Indian Accounting Standards to IFRS Incorporation of the New Schedule VI in place of Old Schedule VI with appropriate notes wherever necessary Complete overhauling of solutions to all Illustrations and requisite changes in the answers to Practical Problems required due to the substitution of New Schedule VI in place of Old Schedule VI Latest questions and problems from examinations conducted by different professional bodies and universities *Accounting: Reporting, Analysis and Decision Making, 8th Edition* Shirley Carlon, Rosina McAlpine, Chrisann Lee, Lorena Mitrione, Lyndie Bayne, Ngaire Kirk, Lily Wong, 2025-11-24 The market leading eighth edition of Accounting Reporting Analysis and Decision Making 8th Edition presents essential accounting concepts with a focus on practical application and current developments It covers Australian Accounting Standards IFRS 18 ESG sustainability ethics and corporate governance using examples from Australia and New Zealand to ensure local relevance

Interface Robin Roslender,Richard M.S. Wilson,2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management
